LCNF Full Submission

Supplementary Answer Form

DNO Name:	SPM	Question Number:	SP029
Question Date:	17 SEP 2010	Answer Date:	21 SEP 2010
Question Topic:			

Original Question No:		Original Answer Date:	
Original Question:			
Original Answer:			

Question:	What is the risk if none of the LCT envisaged actually turns up?

Answer:	The project will deliver a comprehensive analysis of the LV network through the monitoring work that is being undertaken and the software analysis tools that will be developed (GIS) regardless of the delivery of the Low Carbon Technology that may be provided by the partners. This information will provide SPM and other interested parties with a comprehensive understanding on the LV network's operation. In the event that LCT does not materialise, the understanding of the network will still enable studies to be carried out to influence the connection of other LCT at a later date and should not impact the outcomes of the project significantly. Overall we perceive this to be a low risk.
