Project code:	SSET206	Question Number	3
Question date	29 August 2013	Answer date	5 September 2013
Submission section question relates to	2: Project Description Early Bilateral		
Topic	Technical		
Question	Can the customer override the smart plug switch-off in the event that they want to use an appliance immediately?		
Notes on question			
Answer	The smart plugs are intelligent to the point where they allow the monitoring of the connected appliances, reporting immediate wattage energy usage or kWh energy usage over a period of time using Z-Wave communications protocol. They are not a switching device, and do not contain the ability to do so, therefore no override is required.
