Project code:	NGN GN 01	Question Number	10
Question date	03 October 2013	Answer date	08 October 2013
Submission section question relates to			
Topic			
Question	How will you deal with any IPR that is unexpectedly generated through the project?		
Notes on question			
Answer	As stated in the Full Submission document, NGN intend to fully comply with the default IPR arrangements as set out in the Gas NIC Governance Document. Knowledge dissemination and transfer is the key element of the success of this project. The ability of other Network Licensees to be able to assimilate the learning from the project and access and implement the proven new technologies will be the key to delivering the anticipated long term benefits for customers. This approach will apply to all IPR generated as part of the project including any IPR that is generated unexpectedly from with the project. NGN will not be seeking to retain any IPR as part of this project.
