Project code:	UKPN2002	Question Number	7
Question date	1 September 2011	Answer date	6 September 2011
Submission section question relates to	Page 23		
Topic	Involvement of partners		
Question	<i>"the Partners have been chosen for their breadth of experience, expertise and innovation culture" (page 23).</i> Please will you advise how you determined that their costs and their financial contribution in relation to the benefits to them, are fair.		
Notes on question			
Answer	<p>The minimum 10% compulsory contribution from DNOs was used to benchmark the minimum contribution from the FPP project Partners.</p> <p>UK Power Networks secured higher contributions from Partners, with the majority providing contributions between 20% and 30%. This is higher than the average contributions from the Partners of the Low Carbon London project and therefore we believe this is an appropriate level of contribution in relation to the benefits to the FPP partners.</p>
