

EEC 2: GLOSSARY OF COMMONLY USED TERMS

Term	Meaning
Accreditation	The determination of the energy savings attributable to measures under the EEC.
BREDEM	Building Research Establishment Domestic Energy Model
CFLs	Compact fluorescent lamps (energy efficient light bulbs)
CHP	Combined Heat and Power
dCHP	Domestic Combined Heat and Power
Defra	Department for Environment, Food and Rural Affairs
DIY	Do-it-yourself
DTI	Department of Trade and Industry
EEC 1	Energy Efficiency Commitment, 1 April 2002 – 31 March 2005
EEC 2	Energy Efficiency Commitment, 1 April 2005 – 31 March 2008
EESoP	Energy Efficiency Standards of Performance 1 April 1994 – 31 March 1998
EESoP 2	Energy Efficiency Standards of Performance 1 April 1998 – 31 March 2000
EESoP 3	Energy Efficiency Standards of Performance 1 April 2000 – 31 March 2002
EST	Energy Saving Trust
Fuel-standardised energy savings	Energy savings that have been adjusted according to the carbon concentration of each fuel. These coefficients are set out in the EEC Order and are as follows: coal 0.56, electricity 0.80, gas 0.35, LPG 0.43 and oil 0.46
GWh	Giga watt hour (1 million kilo watt hours)
HEES	Home Energy Efficiency Scheme
HRE	The Heat Replacement Effect
Lifetime discounted	The projected energy savings for measures (as set out in Defra's target setting model) were discounted over the lifetime of the measure by the standard Treasury rate of 6% per year
LPG	Liquid petroleum gas
Luminaire	A dedicated light fitting that will only take a CFL
MtC	Million tonnes of carbon
The Order	The Electricity and Gas (Energy Efficiency Obligations) Order 2001 Statutory Instrument number 4011.
The 2004 Order	The Electricity and Gas (Energy Efficiency Obligations) Order 2004 Statutory Instrument number 3392
Priority Group	Defined in the EEC Order as those household receiving one of the follow benefits: council tax benefit; housing benefit; income support; an income-based jobseeker's allowance; an attendance allowance, a disability living allowance; a war disablement pension together with a mobility supplement or a payment under constant attendance allowance; or industrial injuries disablement benefit where it includes constant attendance allowance and state pension credit. Child tax credit and working tax credit are included where the household's relevant income is less than £14,200.
SEDBUK	Seasonal efficiency database of boilers in the UK. The percentage efficiency of a boiler model from this database is used in the calculation of the energy saving.
SHP	Social housing provider: a local authority, council or a registered social landlord
Supplier activity	Energy efficiency work undertaken by suppliers to meet their energy efficiency targets
Target setting model	Defra's assumptions and the calculations used in setting the overall EEC target, as set out on their website: www.defra.gov.uk
TWh	Tera Watt hours (1,000 GWh)
