

Retail Market Review Response

Dear sir/madam

I have just changed my gas and electric after being with my suppliers for over twenty years i was never offered the cheapest tariff at any time until I moved

I would like to see each have one and only one tariff plus giving discount bonus for dual fuel and maybe loyalty you could then get a greater comparison of each company

All companies are happy taking your money if you don't change or complain i think if a tariff gets cheaper yours should go down to the new tariff automatically after say twelve month
