

Dear Mr Hunt

I am concerned about the proposals in your review.

I am an Ebico customer and use low levels of gas and electricity per year (around 850kWh elec and around 5,000kWh gas). The reason why I chose Ebico is because - with such low usage - the standing charge of other suppliers constitutes an excessive proportion of my bills and makes them unnecessarily high. Ebico's approach, of a higher unit price but no standing charge, is ideal for someone like me.

Please can you reassure me that any action you take will not require suppliers to have only tariffs that involve both a standing charge and a unit price.
