Hi Olivia,

The scenarios and the will of a quicker and more efficient distribution connection initiative in the ofgem consultation at <https://www.ofgem.gov.uk/publications-and-updates/quicker-and-more-efficient-distribution-connections> are all important and the initiative worth to endorse. Without digging deeper a definite response to specific scenarios are hard to give, but the ofgem initiative to assess a more efficient distribution is important.

**Best Regards**
