

Hello.

I live in the Shetland Islands and i'm extremely concerned about this ridiculous wind farm project which will have a permanent and detrimental impact on the environment. I have lived in Shetland all my life, and plan to do so as long as the wind farm project does not get approved. My family have lived here for generations, and our day to day lives will be impacted due to the nearly the entire wind farm being visible from our family home.

The environmental impact of this wind farm is extremely worried considering the peat banks will be getting dug up, which means that a worrying amount of carbon will be getting released into the environment. Another of the never ending list of negative factors which this wind farm will cause is the many, many animals, birds and wildlife whose habitats are going to be completely destroyed, resulting in the devastating loss of the wildlife, which is native to the islands and have been here for hundreds of years.

The tourism sector, which is one of the islands biggest sectors will have a serious decline due to the wind farm, Which will put hundreds and hundreds of people out of jobs, and force hundreds of large and small businesses to stop operating, results in an extremely damaging blow to the local economy.

It is scientifically proven that wind farms have an extremely negative affect on people's health. This will cause many people to develop a number of different health problems, which will have an even bigger effect on the many elderly residents of the islands, as well as having a terrible affect on the young people's health, results in them living with this health problems for the rest of their lives.

Its with no doubt that there will be a sharp decline in the population of our beloved isles, resulting in a truly massive decline in the local economy, which will never recover so long the wind farms are on this isles.

So I object to Ofgem giving approval to anything which will allow this absolutely terrible wind farm to be developed on our beloved island, where over 22,000 people call home. I hope you think about this carefully, before you wreck thousands of peoples lives by approving this ludicrous project.
