

Dear Mr Brearley

I writing with regards to your above mention Blog.

In it you state that Energy firms need to take public with them to build a greener future. Well this is not happening in Shetland! . The majority of the Shetland population do not want the pending Windfarm but we have been wholly ignored. SSE with the help of Viking Energy and the Shetland Islands Council have completely rode shot gun over the people. There has been next to no consultation with the public whatsoever!. Our pleas and concerns have been completely ignored and we now run the absolute risk of our beautiful Isle being destroyed. The connector cable must not be allowed to go ahead. We, the people, must be allowed to have our say.

If you are true to your word, you must consider our concerns. There are cheaper, less destructive alternatives to this awful project that should be considered.

I look forward to your acknowledgment and reply

Kind regards
