

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: OSEAIT

Tick if this answer has been provided verbally: ☐

Project code	NGET_OSEAIT	Question Number	9
Question date	03 September 2015	Answer date	07 September 2015
Submission section question relates to	Section 4		
Topic	Facility Access		
Question	Projects which are funded via NIC/NIA could be tested within this facility. How can you ensure that for those projects which have already been given innovation funding, there is no double funding for the same activity.		
Notes on question			
Answer	<p>The projects described within the NIC programme of work are costed for within the NIC budget so no NIA funding will be sought. These projects are described in Section 6, pages 33-35. The rest of the NIC budget is restricted to the development of the facility.</p> <p>Should an NIA project benefit from the use of the facility, the running costs of the facility and any expenses not accounted for within the NIC bid would be incorporated into the NIA proposal, as described in Section 5.3.2, page 28.</p> <p>The Technical Advisory Board will be positioned to prioritise resources and projects to maximise the benefit of the facility and to ensure no double funding occurs.</p>
