Project code	NGET_OSEAIT	Question Number	5
Question date	20 August 2015	Answer date	25 August 2015
Submission section question relates to	Section 4.1, Page 18		
Topic	Facility Access		
Question	<p>If such a facility is as valuable and unique as stated, why are no procedural systems described to manage future access:</p> <ul style="list-style-type: none">(a) Testing at such a facility becomes as usual, how will access to the facility be regulated?(b) Access to the facility as business as usual becomes restricted through demand. How will pricing be regulated?		
Notes on question			
Answer	<p>It is intended that procedural systems to manage future access are to be developed as part of the project (please refer to Appendix VII and Task 22 of the project plan).</p> <p>The governance structure which has been proposed for the project envisages that:</p> <ul style="list-style-type: none">(a) Access to the facility will be regulated and prioritised through the Technical Advisory Board.(b) Pricing will continue to be regulated through the Technical Advisory Board. The facility is part of the regulated business and as such would form part of our existing regulatory reporting obligation. If sold or decommissioned, it would be treated as any other regulatory asset. <p>As you will note from the information provided in Section 4.4 and appendices V and VI, we have received very positive feedback from the industry in relation to his proposal.</p> <p>Our intention is to determine and define the exact details of</p>		

	how industry participants will engage on individual projects after October 2020 through the experience that is obtained during the next 5 years.
