Consultation Response

SEC Changes

Section A – Definitions and Interpretation

CSS Provider Systems – within this definition there is an inconsistency between ‘paragraph’ and ‘Paragraph’.

Appendix X – Registration Data Interface Specification (REGIS)

2.11 – states ‘steps (e) to (l)’ but we believe that it should be ‘steps (e) to (k)’.

2.19 – we question whether this needs to be an ‘(a)’ given there is only on point.

2.21 - we question whether this needs to be an ‘(a)’ given there is only on point.

2.22 – we believe that at the end of ‘(a)’ the ‘or’ is incorrect and should either be removed or replaced with ‘and’.

2.23 - we question whether this needs to be an ‘(a)’ given there is only on point.

2.24 – if our previous comment is accepted then the reference of ‘2.23(a)’ needs to be amended to ‘2.23’.

BSC Changes

BSCP 603

Section 2.7 – Insert “ensure” in first line – “When completing RMAs, the requester should ensure that combinations of data items are consistent with Market Domain Data (MDD) and the SMRS validation rules set out in BSCP501 Appendix 4.2.”

BSCP 504

Section 3.3.15.6 Refers to a “DSBR Instruction”. Could not find a definition of a DSBR Instruction.
