

Response template – Incentive on Connections Engagement

- 1.1 We are seeking views on how well the DNOs have engaged with their large connection customers to ensure they are delivering a service that meets these customers' needs.
- 1.2 The questions we have asked are directly linked to the minimum criteria set out in the ICE guidance document. You can find this on our website <u>here</u>.
- 1.3 We have added an optional section for additional comments and considerations, which is an opportunity for you to provide extra feedback or evidence that you may want to share with us.
- 1.4 If you have any questions on this document, please contact <u>connections@ofgem.gov.uk</u>.

1.5 **Responses should be sent by e-mail by 30 July 2021 to the address above.**

- 1.6 Unless marked confidential, all responses will be published by placing them in Ofgem's library and on our website <u>www.ofgem.gov.uk</u>. Respondents may request that their response is kept confidential. Ofgem shall respect this request, subject to any obligations to disclose information, for example, under the Freedom of Information Act 2000 or the Environmental Information Regulations 2004.
- 1.7 Respondents who wish to have their responses kept confidential should clearly mark the document/s to that effect and include clear reasons for confidentiality. We ask you to consider this carefully as sharing the comments with the relevant DNO may help improve their performance and ensure a transparent and effective ICE process. Respondents are asked to put any confidential material in the appendices to their responses.
- 1.8 We will consider the responses to this consultation and these will be used alongside other evidence for our assessment of the ICE plans.
- 1.9 Each of the questions asked by this consultation is set out in the template below.

- 1.10 **Please ensure that you indicate the DNO or specific licence area** to which your experiences relate. Please note that Northern Ireland is not subject to this consultation.
- 1.11 When considering your responses to these questions, please consider your experiences, the actions that the DNO has undertaken or committed to undertake, and the actions that you consider it could reasonably undertake.
- 1.12 Please make sure you highlight which year a specific event happened in. The regulatory year runs from 1 April to 31 March.

Annex: response template

About you and your week				
About you and your work				
What is the name of your	Prior May 2021 Persimmon Homes			
company?	Post May 2021 Thakeham Group			
Is your response confidential?	No			
Please explain which parts and				
why.				
For a fair process, we prefer the				
DNOs to be able to respond to				
any comments made,				
particularly if they are negative.				
Please consider carefully before				
marking any part of your				
response confidential.			· · · · · ·	
Which DNO's ICE submission is	Scottish and	Southern Elect	ricity Networks	
your response related to?				
If you wish to provide a				
response to the ICE submission				
of more than one DNO group,				
please use a separate				
template for each group.	Type of con	naction	Total	Total MVA

	Section 1: Looking Back report 2020/21								
	We want your views on how well the DNOs have engaged with connections stakeholders over the last regulatory year					ns			
1.	How many of the DNO's stakeholder	none		2	3	4	5	6	>6
	engagement events have you been invited to this year? (This can include engagement outside official events.) Please tick a box.								x
2.	How many DNO Stakeholder events have you been to?	none	1	2	3	4	5	6	>6
	This can also include meetings outside of official engagement events. Please tick a box.					х			
3.	 Tell us about how the DNO engaged with you: a) What did the DNO do? b) How did the DNO do it? c) Did the DNO have a robust engagement strategy? 	 a) SSENs ICE Team present on previous year commitments, as to what the ICE Team have managed to implement into their business, collectively, from the stakeholder engagement groups over the year. The focus; to not only better working raports but processes throughout the connections journey, both business sector specific and company wide. SSEN engage with us stakeholders to find out what we think of the implemented commitments i.e. How are they working, are the processes easy and understandable, is the website navigation capabilities and interactivity suitable, has online content of the application journey improved our knowledge on the processes, are help guide videos of operational elements assisting construction staff in the way intended etc A very effective and pragmatic approach, that has most certainly proved successful (For myself in terms of the online portal application being more tailored for purpose and quality results on 2 major schemes where we had junior construction staff that required a helping hand in getting site ready to enable physical works to proceed). b) SSEN have focused on what matters most to their stakeholders and people, which they have impressively delivered through swift adaptation to digital engagement as a 							
	 delivered through swift adaptation to digital engagement, result of the COVID pandemic – Website Interactivity (Heats Maps, MPANs, Unmetered Supplies, EV) Website & Youtube guide journeys (application & delivered Supplication & delivered Suppli			-					
				livery)					

	• Teams meetings and an interactive app (Slido) so to not
	only present and inform, but engage in live sessions with stakeholders
	Webinars
	Additional focus stakeholder group sessions
	 Work-shop days/surgeries where they focus on particular categories of work and the journey – application, legals, design and delivery
	Customer Sterring Panel Meetings
	c) SSEN have and continue to work with stakeholders to create a robust oriented 3 tier engagement model under their previous engagement commitment, that enables the connections team to engage via strategic, organisational and operational tiers both internally and externally, being us stakeholders (Housing Developers, DG, CICs, ICPs & IDNOs and LAs & EGs). The 1 st stage is engagement to obtain ongoing feedback, internally & externally, on what commitments might be and the priorities of these. 2 nd stage sees the collation, refinement and communication (stakeholder meetings) on the mutual commitment decisions being made and input into their business model, to deliver on all fronts of the connections journey. The 3 rd stage process sees SSEN deliver information on the processes and changes of implemented commitments focusing on applications, design, delivery & engagement.
	The DNO's work plan
4. <i>Objectives:</i> Have you seen the DNOs work plans and the objectives they	SSEN always publish to their stakeholders, work plans and objectives, so to reassure us that our concerns are the core focus of their mission to deliver time and time again, inline with legislation and regulation;
outline? a) Does it take into consideration your needs? If so, how?	• Reform Pre-Development Enquiry process through specified team contact, instead of application process, to ensure stakeholder needs are fully understood and met down the line via application submission
b) If it doesn't please explain	 Service Alteration guide creation to help understand requirements and processing stages of such applications
why.	 Electricity supplier identification – A a self-serve web function for us to access information quick and easily
	 Improve connections contact and escalation guide – Provided a clearer reporting structure of contact groups broken down in categories i.e. General Enquiries, Emergency Works, Complaints, Feedback etc.
	 Create bullet-point information & illustrative guides and Frequently Asked Questions documents for different

r		
		categories, specific connection type applications, unmetered supplies, EV, alterations etc.
		 Connection Offer Expense breakdowns to better understand associated costs within quotations
		Design Approval consultation for stakeholder feedback
		 Updating Connections stakeholders on Decarbonisation of Heat in relation to our connections journey
		 Increase regularity of demand and generation heat map updates to ensure we are getting the most up to date information so to deliver on our schemes
		The list is extensive but streamlined to be 100% effective and delivered in planned and timely stages throughout their business. To date, there have been 27 core completed commitments on target that included independent audits too, an exceptional achievement!
5.	 Actions: Do you think the DNO has delivered its work plan? a) How has the DNO done this? b) If you do not think the DNO has delivered its work plan, please explain why. 	SSEN have delivered, constantly improving and continue to do so through massive results driven collaboration. To date, not just the most exemplary DNO, but have created the most successful business engagement strategy within the multi-utilities sector (I can afford to make such a bold statement as have worked in multi-utilities for close on two decades dealing with them all; DNOs, IDNOs, ICPs, GDNs, IGTs, FNPs etc.)
6.	Outputs: Were the outputs (KPIs, targets etc) in the DNO's work plan appropriate? Did the DNO meet these outputs? Please explain why.	SSEN don't just consider our needs within their work plans, allot of SSEN work plans are co-created with us stakeholders and their people, so have the desired effect majority of the time. If for any reason SSEN is unable to deliver on any intended improvement they are very open as to why the target has not been met, as well as how they are going to resolve or what their plan B is, in line with our requirements.
	Your feedback	on the DNOs stakeholder engagement performance
7.	Do you think the DNO's strategy, activities and outputs have taken into account ongoing feedback from a broad and inclusive range of connections stakeholders?	SSENs 3 tier engagement model, was created based on previous engagements and commitments, its core purpose is to take into account ongoing feedback from us stakeholders in an ever- evolving environment.

8.	How satisfied are you with the DNO's overall engagement	very unsatisfied	not satisfied	satisfied	very satisfied
	performance? Please tick one box.				Х
9.	General feedback – please provide any further feedback on the DNO's 2019/20 engagement performance not covered in your responses above.	year, pioneering hands up when confidence tin t companies futu	aged to delivery tim g in customer engag they have made m heir customers in re re around what the very aspect of electr	gement because th istakes, reassure a esolving issues and ir people and stake	hey put their and reinstill I focus the

Section 2: Looking Forward plans 2021/22					
We want your views on what the DN	O aims to achieve in the coming year				
10. Are you satisfied that the DNO has a comprehensive and robust strategy for engaging with connection stakeholders and facilitating joint discussions where appropriate?	Yes				
11. Do you agree that the DNO has a comprehensive work plan of activities (with associated delivery dates) that will meet the requirements of its connection stakeholders? If not, has the DNO provided reasonable and well-justified reasons? What other activities should the DNO do?	Yes				
12. Do you consider that the DNO has set relevant outputs that it will deliver during the regulatory year (eg key performance indicators, targets, etc.)?	Yes				
 13. Would you agree that the DNO's proposed strategy, activities and outputs have been informed and endorsed by a broad and inclusive range of connection stakeholders? If not, has the DNO provided robust evidence that it has pursued this engagement? 	Yes				

Section 3 (optional): Other comments and considerations					
This is an opportunity for you to provide extra feedback on specific areas					
14. Would you like to share any other comments or any further considerations on how you think DNOs could better meet the needs of all customer types?	SSEN work exceptionally hard to work with their people and stakeholders, considering all proposals and ideas in an inclusive process whilst still working to meet the wider targets for our nation:				
	Cutting their carbon intensity by 60%, targeted for 2030, to meet the UKs net zero emission targets				
	Treble renewable energy output, targeted for 2030, meeting yearly outputs, working to lead as a DNO in the sustainable focused future				
	Working toward their group Fair Tax and a real Living Wage target, working to pay the right level of tax at the right time and to ensure fair pay through their supply chain through to delivery
