Statutory consultation on the proposed combining of two existing Bacton exit points in NGG's Gas Transporter Licence

Dear David,

RWE Supply & Trading continues to support option 2, for the reasons explained in our letter of 7th February 2021, and considers Ofgem's impact assessment on the quantitative benefits of this option to be reasonable.

We trust that the industry-led process to change the Uniform Network Code to clarify rules for the newly aggregated baseline and to introduce competing auctions at Bacton will be undertaken quickly and efficiently, so as to ensure the benefits arising from option 2 are fully realised.

Our response is not confidential.

Yours sincerely,

Steve Rose
