## **OFGEM CONSULTATION**

### **Increasing Coordination in the development of offshore energy networks**

I wish to support the submission made to this consultation by Barford and Wrampingham Parish Council. [690c7a\\_877c90e7070e43149fc312532b0f158a.pdf \(filesusr.com\)](#).

Whilst I support the concept of offshore windfarms, **I oppose the current ad-hoc radial approach to linking the windfarms to the national grid** for the following reasons:

1. The approach will cause further, long term, massive disruption to residents, local industries and the environment.
2. An integrated approach including an offshore transmission network, suitable for connecting windfarms for the foreseeable future, would be more efficient and would save the taxpayer large amounts of money (please see [Offshore Wind Infrastructure | George Freeman MP](#)).

Please put a brake on all planned radial connections and focus on developing a professional, efficient, world-class industry for the UK.

Yours sincerely

*Keith Waldron*
