Dear Ahmed

**Consultaion on Capacity Market Rule amendments (Evergreen, CMR and Applicant Notice)**

InterGen owns and operates three CCGT gas fired power stations at Coryton, Spalding and Rocksavage in addition to an OCGT gas fired power station at the Spalding site. The three CCGT stations have participated in the Capacity Market as existing CMUs since its inception, whilst the new build OCGT station was awarded a 15 year contract in the T-4 2016 auction.

Below are the responses to the directly posed questions in the above-mentioned consultation document.

Should you wish to discuss any of our comments directly, please do not hesitate to get in touch.

Lisa Mackay  
Trading and Commercial Director  
InterGen UK

***Question 1: Do you agree with our proposed Rule amendments to facilitate the implementation of reusing Exhibits and other information?***

InterGen agrees with the proposal to reuse Exhibits and other information. This will reduce the risk of administration errors and speed up the overall pre application process.

**Question 2: Do you agree with the draft Rules to implement CP270 and the partial implementation of CP271?:**

InterGen agrees with the implementation of CP270 and partial implementation of CP271. The improvement of transparency and clarity of the capacity operating in the Capacity Market is welcomed.

**Question 4: Do you agree with our proposed amendments to the Rules to facilitate our Applicant Notice proposal?**

InterGen agrees with the implementation relating to Applicant Notices. As it would improve the communication channels between the Delivery Body and Capacity Market Participants.
