

Green Gas Support Scheme (GGSS)

Issue 2
30 Apr 2022

Quarterly Report

January to March 2022

The Green Gas Support Scheme (GGSS) quarterly report provides key statistics and data on the GGSS and the associated Green Gas Levy (GGL). Under regulation 65¹ of the Green Gas Support Scheme Regulations 2021², Ofgem is obligated to publish a quarterly report containing information relating to the scheme within one month of the end of each quarter. This report covers the second quarter since scheme launch, from 1 January to 31 March 2022.

Table 1: Reporting periods and publication deadlines

Reporting Period	Publication deadline
January to March	30 April
April to June	31 July
July to September	31 October
October to December	31 January

The regulations also require us to publish an annual report on the GGSS and GGL by 31 July each year. The first annual report will cover the period from scheme launch on 30 November 2021 to 31 March 2022 and will be published by 31 July 2022.

About the GGSS

The GGSS is designed to support the deployment of new anaerobic digestion (AD) biomethane plants to increase the proportion of green gas in the gas grid. Support is provided to registered biomethane producers based on the volume of eligible biomethane, produced from AD, that they inject into the gas grid.

<<https://www.legislation.gov.uk/uksi/2021/1335/regulation/65/made>>

² [Link to Green Gas Support Scheme Regulations 2021](https://www.legislation.gov.uk/uksi/2021/1335/contents/made)
<<https://www.legislation.gov.uk/uksi/2021/1335/contents/made>>

The GGSS is funded through the GGL, which places an obligation on licensed fossil fuel gas suppliers in Great Britain to pay a quarterly levy based on the number of gas meter points they supply.

Ofgem is the administrator of the GGSS and associated GGL. We administer the GGSS in line with the Green Gas Support Scheme Regulations 2021, which came into force on 30 November 2021.

The GGSS opened to applications at 9am on 30 November 2021 when our application portal ("the GGSS Portal")³ went live.

Our dedicated GGSS and GGL web pages⁴ provide further information for prospective applicants or those interested in finding out more about the scheme, including information on the eligibility requirements, the tariffs that are available and how to apply, as well as key information on supplier obligations.

We have also published dedicated GGSS⁵ and GGL⁶ guidance documents, which further explain our administration of the scheme, including guidance on:

GGSS

- How to apply for a tariff guarantee
- How to register as a scheme participant once commissioned
- Tariffs, tariff tiers and tariff start dates
- Ongoing obligations on participants
- How to submit periodic data and receive payments

GGL

- How to submit meter point data
- The provision of credit cover
- Making levy payments
- Our approach to compliance and enforcement
- Levy exemptions

Registered Scheme Participants

Information on the number of registered scheme participants, the volume of biomethane produced and the periodic support payments made are shown below in **Table 2**.

Table 2: Registered scheme participants, biomethane production and payments

Number of scheme participants	0
Volume of biomethane produced for injection by scheme participants	0
Number of periodic support payments made	0
Total value of periodic support payments made	0

As of 31 March 2022, we had received a number of applications for tariff guarantees (see **Table 3**), but none had progressed to be registered on the scheme.

Tariff Guarantee Applications

Tariff guarantees (TGs) are a compulsory stage of applying to the GGSS. Tariff guarantees allow prospective scheme participants to secure a tariff rate before their installation is commissioned and registered on the scheme.

As of 31 March 2022, we had received 11 applications for tariff guarantees⁷ since the scheme opened to applications on 30 November 2021. Of these applications, eight had been issued with a provisional tariff guarantee notice, of which five had been granted a tariff guarantee.

Table 3: Tariff guarantee application progress

Initial applications made (at stage 1)	11
Provisional notices issued (at Stage 2)	8
Tariff guarantees granted	5

Additional Capacity Applications

Scheme participants may also apply to register additional capacity, in addition to the maximum initial capacity (MIC) applicable to their initial registration. As additional capacity registered on the scheme will also utilise scheme budget, applications for additional capacity must also be checked against the Application Budget cap.

As of 31 March 2022, we had received no applications for additional capacity. Applications for additional capacity may only be made by registered participants, so we will not receive any applications for additional capacity until at least one scheme participant is registered.

Table 4: Additional capacity applications

Number of applications to register additional capacity received	0
Number of participants registered in respect of additional biomethane	0

⁷ Information on the tariff guarantee application process can be found in our GGSS guidance. [Link to Green Gas Support Scheme guidance](https://www.ofgem.gov.uk/publications/green-gas-support-scheme-guidance) <<https://www.ofgem.gov.uk/publications/green-gas-support-scheme-guidance>>

Budget Allocation

The GGSS includes an annual Application Budget cap, set by the Department for Business, Energy and Industrial Strategy (BEIS). This is the total estimated spend that can be allocated to applicants each financial year. All applications for a Tariff Guarantee (TG) or for additional capacity will be checked against the Application Budget cap to ensure that there is available budget for them to register and receive payments under the scheme based on their estimated production.

Please see our scheme guidance and the BEIS document, 'GGSS - Budget Management'⁸ for further details of the Application Budget cap.

The figures in **Table 5** show the budget available for each of the financial years in which applications may be made.⁹ Publishing these figures is intended to allow prospective applicants to check that there are sufficient funds remaining in the financial year they intend to commence injection, and in subsequent years. Based on Tariff Guarantee applications received, the allocated budget shows a sharp rise between FY22/23 and FY23/24 as the majority of applicants to date are expected to commission during FY22/23.

The figures in **Table 5** are correct as of 31 March 2022. We also publish more frequently updated budget figures on our website¹⁰.

Table 5: Budget allocation

	FY 21/22	FY22/23	FY23/24	FY24/25	FY25/26
Annual Application Budget cap ¹¹	£37,000,000	£37,000,000	£65,000,000	£97,000,000	£130,000,000
Budget allocated (TG applications received)	£233,938	£5,428,656	£25,452,361	£36,014,372	£37,840,848
Budget committed (TGs granted)	-	£3,397,957	£16,677,258	£22,218,404	£23,189,811
Remaining budget available	£36,766,062	£31,571,344	£39,547,639	£60,985,628	£92,159,152

⁹ The GGSS regulations require that to join the scheme, participants must commence biomethane injection into the gas grid no later than 30 November 2025.

¹⁰ [Link to Green Gas Support Scheme – Applicants](https://www.ofgem.gov.uk/environmental-and-social-schemes/green-gas-support-scheme-and-green-gas-levy/green-gas-support-scheme-and-green-gas-levy-applicants) <https://www.ofgem.gov.uk/environmental-and-social-schemes/green-gas-support-scheme-and-green-gas-levy/green-gas-support-scheme-and-green-gas-levy-applicants>

¹¹ The Annual Application Budget cap is a cap on the estimated spend that can be allocated for biomethane production within each scheme year.

Levy Payments

The GGSS is funded by a levy placed on all licensed fossil fuel gas suppliers in Great Britain, known as the Green Gas Levy (GGL). The levy rate is set annually by BEIS, and the obligation period runs the full duration of a scheme year (1 April to 31 March). Levy payments are due on a quarterly basis, and the first levy payment must be made by obligated suppliers in May 2022.

Prior to a levy payment being due, obligated suppliers are required to have a level of credit cover¹² lodged. This helps ensure levy payments are collected in a timely manner and reduces the likelihood of a mutualisation¹³ event being required. Where a supplier fails to make a levy payment or mutualisation payment in full by the due date, Ofgem will draw down funds from a supplier's lodged credit cover.

Suppliers of at least 95% green gas can be exempted from paying the levy. Before each scheme year, suppliers may submit evidence to Ofgem demonstrating the likelihood that they will be providing at least 95% green gas in that scheme year and Ofgem will determine whether that supplier should be 'provisionally exempt' based on that evidence. Provisionally exempt suppliers will not have to pay the levy or provide credit cover during the scheme year.

At the end of the relevant scheme year, provisionally exempt suppliers must demonstrate that they have supplied at least 95% green gas during that year. If they cannot demonstrate this, they will no longer be exempt from the levy and will be required to make backdated levy payments.

Scheme Suppliers and Levy Payments

Table 6 shows the number of obligated suppliers under the scheme. The number of obligated suppliers can vary quarter to quarter dependent on licence revocation and/or approval of gas supply licenses. One supplier has been determined to be provisionally exempt for 2022/2023.

The first levy payment is not due to be paid until May 2022, so there have not yet been any payments made by scheme suppliers.

Table 6: Scheme suppliers and levy payments made

Number of scheme suppliers	98
Number of provisionally exempt scheme suppliers	1
Sum of the quarterly levy payments paid by scheme suppliers	N/A

¹² Credit cover can be in the form of a payment made to Ofgem, a suitable letter of credit or a combination of these. [Link to further details in our Guidance on the GGL scheme](https://www.ofgem.gov.uk/publications/green-gas-levy-guidance): <<https://www.ofgem.gov.uk/publications/green-gas-levy-guidance>>

¹³ Mutualisation is a process used to help ensure that in the event of a supplier or suppliers failing to meet their payment obligations (through levy payments and/or credit cover), there is not a shortfall in the levy fund. For further information please refer to our GGL guidance.

Supplier Compliance

On 25 February 2022, Ofgem confirmed credit cover requirements for the upcoming quarter to scheme suppliers. The deadline to provide credit cover, if required, was 24 March 2022. There were three cases of non-compliance over the reporting period, two instances due to providing credit cover after the deadline and one instance of non-payment.

Ofgem are required by GGSS Regulations to publish certain information about such defaults on the Green Gas Levy default register.¹⁴ The three incidents were added to the default register on 29 March 2022 and were published on the Ofgem website on 04 April 2022. In subsequent reports, after the first levy payments have been made, we may report here on:

- Instances of a supplier failing to pay, or making a late payment of:
 - A quarterly levy payment,
 - A levy credit payment,
 - A payment of additional credit cover,
 - A mutualisation payment,
- Instances of Ofgem:
 - Drawing down on a supplier's credit cover
 - Carrying out a mutualisation process.

Further Information

For more information visit the Ofgem GGSS and GGL web pages at:

<https://www.ofgem.gov.uk/environmental-and-social-schemes/green-gas-support-scheme-and-green-gas-levy>

Here you will find information about the application process, the tariffs that are available and the remaining scheme budget. Existing applicants can also access the application portal.

If you can't find the information you need on our website, our customer service team will be happy to help. You can contact us by email at GGSS.enquiry@ofgem.gov.uk or by telephone at 0300 303 5997

For press enquiries please contact Ofgem's press office on 0207 901 7179.
