### **Question 1**

Falcon Foodservice agrees with the decision on which projects to fund. By progressing to village trials, we will be able to demonstrate to a wider audience that hydrogen catering equipment has an important role to play in carbon reduction, without compromising performance.

We believe that the village trials will be the catalyst for change and will assist in the market shift towards hydrogen fuelled appliances, assisting in the drive towards net zero.

### **Question 2**

We do not have any views; however, we would anticipate one of the key deliverables from the village trials will be consumer endorsement for Hydrogen use.

### **Question 3**

No response.
