

To whom this may concern.

I am responding to this sham consultation like I and many others do, who question the whole fake process of public consultations in all areas of activities that affect people's lives without any meaningful input or fairness. The fraud and destruction here in Shetland caused by this racketeering wind farm and the human rights abuse enshrined by the Scottish Planning System, that is utterly rigged in favour of developers whilst lacking in any involvement or equal rights in major changes to local communities.

The democratic deficit here is at a fundamental human rights abuse criminal level and has absolutely no respect for affected communities social & environmental justice, no inclusion, profoundly unequal and totally discriminatory.

The people of the Shetland Isles were never asked about any of this yet we sit here seeing vast destruction & vandalism of a wild undeveloped landscape, world renowned wildlife habitats ripped up by an utterly uncaring bunch of landscape terrorists who flout the pathetic planning conditions whilst SEPA hide and fail in their duties to take peat destruction, bird scaring measures in the heart of bird nesting areas as well as meaningless peat and water drainage measures polluting an SSSI loch and countless burns and water courses. Added to this now the weather is windy & drier, clouds of rock dust coating miles of peat verges.

You are a despicable organisation sitting in a position to do something about the destruction of Shetland with ever more racketeering scam wind turbines proliferating for profits & subsidies to the energy mafia while ordinary people in Shetland sink into greater levels of fuel poverty. You are part of the evil cancer of democratic deficit & greed that the UK has sunk to.

I curse your very existence.
