

Energy Company Obligation (ECO4) Interim Delivery Data Dictionary V1.0

This document provides a data dictionary and general information for suppliers to complete the Monthly Notification Template for ECO4 Interim Delivery measures installed from 1 April 2022 – 30 June 2022. We have repurposed the ECO3 Register to allow ECO4 Interim Delivery measures to be notified through that. We will ensure that these contribute to suppliers' ECO4 obligations.

This data dictionary sets out each of the fields to be completed on the Notification Template, the questions suppliers should be answering when completing the field, as well as an explanation of the information suppliers should provide. It then sets out the data field type required, the accepted format and validations involved for each field.

The data dictionary also distinguishes between types of data that are provided in the Notification Template.

- **Core Data:** must be provided in order for a notification to be made. If core data is omitted or provided in a format other than the accepted format, the attempt to notify the measure will fail.
- **Required Data:** must be provided before we can process the notification. If this information is omitted or not provided in the correct format, the notification will be made, but we will be unable to process the notification.
- **Optional Data:** we request suppliers provide this in order to assist our validation and audit processes, and to assist suppliers should they later wish to transfer a measure to another supplier.

Suppliers should be aware that Ofgem's system cannot accept data unless notified in accordance with the accepted format as specified below. The accepted format is case sensitive and includes headings. As noted above, where core data is provided in a format other than the accepted format, the attempt to notify the measure will fail.

Ofgem will perform additional validations to check dependencies of mandatory fields and measure eligibility.

Submitting the Notification Template:

- Format "A" - Alphabetic.
- Format "N" - Numeric.
- File name should be AAA_AAANN_VN.N where the three letter prefix is the supplier's three letter acronym, AAANN is the notification month and year and VN.N refers to the approved template version. The notification month and year should be consistent with the following example: June 2022 submitted as JUN22.
- File should be submitted in .csv format.
- File should include the heading for each field.

Completing the Notification Template

- When a field is not applicable, or not required for your notification (as indicated by the 'required when' statement in the 'Mandatory' column), it should be populated with 'N/A'. This will be an accepted format entry except when completing the address data. The address fields must not be completed with 'N/A' as this will not be accepted by the Ofgem system.

Associated Documents

For further information on any of the fields listed below or information on our administration of ECO4 Interim Delivery, refer to the ECO3 Guidance, available on our website. There are restriction for ECO4 Interim Delivery, more information on this can be found in the [Draft ECO4 Guidance: Interim Delivery](#).

For information on formatting addresses, refer to [Address Formatting Guidance note, available on our website](#).

For information on energy efficiency measures which suppliers can use to meet their ECO4 obligations through Interim Delivery, including how to differentiate between 'measure categories' and 'measures', refer to the ECO3 Measures Table, available on our website.

Table 1: Data Dictionary

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
Overall_Obligation_Period	Which overall obligation period has the measure been delivered under?	This is based on the date of completed installation (DOCI).	Alphabetic	ECO3Int	If DOCI is between 01/04/2022 and 30/06/2022 (inclusive), the entry should be 'ECO3Int'.	Required	Overview
ECO_Supplier_Reference	What is the ECO supplier reference number of the supplier that owns the measure?	<p>This refers to the unique ECO supplier reference number allocated to every supplier by Ofgem. This takes the form AAANNNNNNNNA. The first three characters are an assigned acronym identifier for the company name. The eight alphanumeric characters are the licence-holder's company registration number and the final letter denotes the licence type, E = Electricity, G = Gas.</p> <p>This entry identifies the supplier whose obligations the measure will be credited towards. The ECO supplier reference number that is provided must be for the supplier that owns the measure. In relation</p>	Alphanumeric	AAANNNNNNN NA AAAAANNNNNN A	<p>The reference number must be a valid supplier reference.</p> <p>Only entries in the accepted format are valid.</p>	CORE	Overview

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		to transferred measures, this will be the supplier that is the 'buyer'.					
Obligation_Category	Which of the obligations is the measure to be credited towards?	This refers to the ECO obligation the measure is to be credited against (i.e. HHCRO).	Alphabetic	HHCRO	Only entries corresponding to the list are valid.	CORE	Overview
Measure_Type	Which measure was installed at the premises?	<p>This describes the measure type installed at the premises (each measure installed is to be reported in a separate row).</p> <p>When completing this field, refer to the ECO3 Measures Table published on our website. This sets out the 'Measure Name: format for notification to Ofgem'.</p> <p>Measures need to be notified in the exact naming convention specified in the ECO3 Measures Table under 'Measure Name: format for notification to Ofgem'.</p>	Alphanumeric	As per the advised list of measures in the ECO3 Measures Table	Only entries corresponding to those in the ECO3 Measures Table are valid where DOCI is between 01/04/2022 and 30/06/2022	CORE	Measure
Measure_Reference_Number	What is the unique measure reference number that the supplier has generated for this particular measure?	This is the unique reference number generated by the supplier and ascribed to the measure being notified. This allows the measure to be identified by both suppliers and Ofgem.	Alphanumeric	AAANNNNNNN	Only entries in the accepted format are valid.	CORE	All

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>The first three characters are an assigned acronym identifier for the company name. The following seven numbers should be generated by the supplier.</p> <p>This reference number must be unique across ECO1, ECO2, ECO2t, ECO3 and ECO4.</p>					
Purpose_of_Notification	What is the purpose of this submission?	<p>This indicates the reason for notifying the measure.</p> <p>'New Notification' should be entered when notifying a measure for the first time, provided it is not subject to an extension request.</p> <p>'Edited Notification' should be entered when an existing notification is being amended and the measure is re-notified.</p> <p>'Extended Notification' should be entered when the measure has an extension request associated with it.</p>	Alphabetic	New Notification, Edited Notification, Extended Notification,	Only entries corresponding to the list are valid.	Required	Overview

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		'Automatic Late Extension' should be entered when the measure is being notified after its Notification Period and falls within a supplier's 5% automatic late extension quota.					
Eligibility	What is the ECO eligibility route?	<p>Indicates how the customer or premises has been targeted and deemed eligible for ECO.</p> <p>Social Housing with an EPC of D is only available for Innovation Measures.</p> <p>For further information on the various routes to eligibility, please refer to the ECO3 Guidance.</p>	Alphabetic	<p>Help to Heat Group,</p> <p>Social Housing EFG,</p> <p>Social Housing D,</p> <p>LA declaration,</p> <p>AW In-fill</p>	Only entries corresponding to the list are valid.	CORE	Property / Person
HTH_Verification_Method	How has Help to Heat Group membership been determined?	<p>For further information on how to identify whether a person is eligible for the scheme, please refer to the ECO3 Guidance.</p> <p>'WHD Core Group' may be entered where the supplier can produce a WHD Core Group notice at audit for the help to heat group member.</p> <p>A data link exists with the Department of Work and Pensions</p>	Alphabetic	<p>WHD Core Group</p> <p>DWP Match</p> <p>ECO Eligible Referral</p> <p>HTHG Benefit Letter</p> <p>Self Declaration</p>	Only entries corresponding to the list are valid.	Required when: 'Eligibility' = Help to Heat Group	Property / Person

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>(DWP) so that help to heat group eligibility can be verified through a data matching exercise. Suppliers should enter 'DWP Match' for measures where help to heat group eligibility has been verified using this method.</p> <p>Only suppliers that have signed up to the ECO Eligible Referrals (EER) route with DWP should select 'ECO Eligible Referral'.</p> <p>'Self Declaration' may be entered where a supplier can produce a Child Benefit Self-Declaration at audit.</p> <p>'MOD Documentation' may be entered where a supplier will produce a copy of the relevant documents specified in the ECO3 Guidance at audit.</p> <p>'Other' should only be entered in exceptional circumstances when agreed with Ofgem.</p>		<p>MOD Documentation</p> <p>Other</p> <p>N/A</p>			

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
DWP_Reference_Number	<p>If the measure is using the 'DWP Match' verification method, what is the reference number provided by the data matching provider confirming DWP have verified the customer is a HTHG member?</p> <p>If the measure is using the 'ECO Eligible Referral' verification method, what is the unique reference number provided by DWP?</p>	<p>Where a customer was verified as a member of the HTHG using the DWP data matching service, enter the reference number provided by the data matching provider.</p> <p>Where a customer was verified as a member of the HTHG using the EER route, enter the unique reference number used in the verification process. This should start with 'EER' and a prefix to indicate the supplier.</p>	Alphanumeric	<p>NNNNNNNNNN</p> <p>AAA_ANNNNNN</p> <p>AAA_AANNNNN</p> <p>N/A</p>	<p>Only entries in the accepted format are valid.</p> <p>EER URNs must be a maximum of 50 characters.</p> <p>Only numeric characters can follow the prefix "EER_A" or "EER_AA"</p>	Required when: 'HTH_Eligibility_Verification_Method' = DWP Match or 'ECO Eligible Referral'	Property / Person
Associated_Insulation_MRN_for_Heating_Measures	For heating measures, what is the associated insulation measure reference number?	<p>Heating upgrade measures can only be installed into a property alongside certain insulation measures.</p> <p>Where the measure is a heating upgrade, the related primary insulation MRN should be provided here.</p>	Alphanumeric	<p>AAANNNNNNN</p> <p>N/A</p>	Only entries in the accepted format are valid.	Required	Overview

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>The only exception is an ESH upgrade installed to a property where the pre main heat source was not a central heating system, district heating system or ESH. These do not require a primary insulation measure.</p> <p>Where heating measures are being notified with a 'broken' type, the MRN of the related primary insulation measure can be notified here to exempt the heating measure from the broken heating cap.</p>					
Associated_AW_Infill_Measure_1	If the measure is part of a group of measures which involve infilling, what are the associated MRNs?	There is an 'infill' mechanism in ECO3 where SWI or DHS measures can be installed to properties that do not meet the typical eligibility routes, provided that there are eligible properties in the same area. See the ECO3 Guidance for more information on what constitutes as the 'same area'. ¹	Alphanumeric	AAANNNNNNN N/A	Only entries in the accepted format are valid.	Required when: 'Eligibility' = AW Infill	Overview

¹ Definition of solid wall insulation can be found in article 2 of the ECO3 Order - <http://www.legislation.gov.uk/ukxi/2018/1183/article/2/made>

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		Provide the first associated supporting MRN for the AW In-fill measure.					
Associated_AW_In-fill_Measure_2	If the measure is part of a group of measures which involve infilling, what are the associated MRNs?	<p>There is an 'infill' mechanism in ECO3 where SWI or DHS measures can be installed to properties that do not meet the typical eligibility routes, provided that there are eligible properties in the same area. See the ECO3 Guidance for more information on what constitutes as the 'same area'.</p> <p>Provide the second associated supporting MRN for the AW In-fill measure.</p>	Alphanumeric	AAANNNNNNN N/A	Only entries in the accepted format are valid.	Required when: 'Eligibility' = AW Infill	Overview
SWMR_RN	What is the solid wall minimum requirement reference number?	Measures delivered to solid-walled homes can be counted towards an obligated supplier's SWMR. If a collection of measures has been used to meet this, the reference number unique to the solid-walled home in question must be entered. All standard SWI measures should also enter this unique reference number where they are intended to count towards SWMR.	Alphanumeric	AAA/N.NN/NNN /NNNNNN N/A	Only entries in the accepted format are valid.	Required when: Measure is intended to count towards SWMR, either as eligible SWI or as an SW alternative measure (see guidance for eligibility criteria).	Overview

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		The name should reference the supplier code, pre-installation position of the SWI measure which could have been installed at the property (2.00, 1.70, 1.00), percentage of the exterior facing walls which are of solid construction (whether they're insulated or not), followed by a reference number unique to the property.					
Date_of_Completed_Installation	On what date was the installation of the measure completed?	The date of completed installation (DOCI) indicates the date on which the installation of the measure was 'complete'. Please refer to the ECO3 Guidance for information on how this date is determined.	Date Field	dd/mm/yyyy	Only DOCI between 01/04/2022 and 30/06/2022 (inclusive) are valid. Only entries in the accepted format are valid.	CORE	Overview
Building_Number	Where relevant, what is the number of the building in which the measure was installed?	Provide the number of the building (if applicable).	Alphanumeric	Max character length of 50 characters	Only entries in the accepted format are valid.	CORE when: 'Building_Name' is unavailable	Property / Person

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
Building_Name	Where relevant, what is the name of the building in which the measure was installed?	Provide the name of the building (if applicable).	Alphanumeric	Max character length of 100 characters	Only entries in the accepted format are valid.	CORE when: 'Building_Number' is unavailable	Property / Person
Flat_Name/Number	Where relevant, what is the name or number of the flat in which the measure was installed?	Provide the name or number of the flat (if applicable). The word 'Flat' should be entered where appropriate (e.g. 'Flat 1').	Alphanumeric	Max character length of 50 characters	If a flat name or number is available, it must be provided. Only entries in the accepted format are valid.	Optional	Property / Person
Street_Name	What is the name of the street on which the premises is located?	Provide the name of the street on which the premises is located.	Alphanumeric	Max character length of 50 characters	Only entries in the accepted format are valid.	Optional	Property / Person
Town	What is the name of the town or city in which the premises is located?	Provide the town in which the premises is located.	Alphanumeric	Max character length of 50 characters	Only entries in the accepted format are valid.	CORE	Property / Person
Post_Code	What is the postcode for the premises?	Provide the full Royal Mail postcode corresponding to the address provided.	Alphanumeric with/without 'Space'	AN NAA ANN NAA	Postcodes with and without spaces will be accepted	CORE	Property / Person

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
				AAN NAA AANN NAA ANA NAA AANA NAA	Only entries in the accepted format are valid.		
Unique_Property_Reference_Number_(UPRN)	What is the UPRN for the premises?	<p>Provide the unique property reference number that is the unique twelve digit number assigned to every unit of land and property by the National Land and Property Gazetteer and recorded by local Government.</p> <p>Suppliers are encouraged to submit this data where it is available as standard.</p> <p>'N/A' may be entered where the UPRN is unknown.</p>	Alphanumeric	NNNNNNNNNN NN N/A	<p>Numeric entries must be 12 digits.</p> <p>Only entries in the accepted format are valid.</p>	Optional	Property / Person
Rural_Sub_Obligation	Is the measure intended to be credited towards the rural sub-obligation?	If a measure is installed in a rural area, then 'Yes' should be entered in this field.	Alphabetic	Yes No	Only entries corresponding to the list are valid.	Required	Overview

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
Output_Area	What is the OA code in which the premises is located?	Provide the code for the Output Area (OA) in which the premises is located. For more information on OAs please see the ECO3 Guidance.	Alphanumeric	ANNNNNNNN N/A	Only entries in the accepted format are valid.	Required when: 'Rural_Sub_Obligati on' = Yes	Property / Person
Private_Domestic_Premises	Was the measure installed at a private domestic premises?	Indicates whether the premises is generally not owned and/or let by a social landlord. For further information on the definition of private domestic premises, please refer to the ECO3 Guidance.	Alphabetic	Yes No N/A	Only entries corresponding to the list are valid.	Required when: 'Eligibility' = Help to Heat Group or LA declaration	Property / Person

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
Tenure	What is the tenure of the premises?	<p>Provide a description of the tenure of the premises, for example 'Owner Occupied', 'Owner Occupied FG', 'Private Rented Sector ABCDE', 'Private Rented Sector FG', 'Social Housing (RSL)', 'Other'.</p> <p>'PRS FG' may be entered where there is no EPC in this tenure type.</p>	Alphabetic	<p>Owner Occupied</p> <p>PRS ABCDE</p> <p>PRS FG</p> <p>Social Housing (RSL) EFG</p> <p>Social Housing (RSL) D</p> <p>Other</p>	Only entries corresponding to the list are valid.	Required	Property / Person
EST_Land_Registry_Number	What is the EST online owner verification unique reference number (URN)?	<p>Energy Saving Trust are able to validate which properties are private via their online portal. Suppliers are then given the URN which needs to be sent along with measure details.</p> <p>This URN must be a 10 digit number.</p>	Numeric	NNNNNNNNNN	Only entries in the accepted format are valid.	Optional	Measure
Property_Type	What type of property is the premises?	<p>Provide the type of premises the measure was installed to.</p> <p>When completing this field, refer to the Appendix 1 of this document.</p>	Alphabetic	As per the advised list of Property Types in Appendix 1	Only entries corresponding to the list are valid.	Required	Property / Person

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		This sets out the 'Property Type Name: format for notification to Ofgem'. Property Type needs to be notified in the exact naming convention specified.		of this document			
Scoring_Method	What scoring method has been used?	Indicates the methodology used to calculate the savings for the measure. All measures except for DHS will be scored using deemed scores (DS) methodology. For DHS measures, SAP, RdSAP or a new, appropriate or alternative methodology (NM) must be used.	Alphabetic	SAP RdSAP DS NM	Only entries corresponding to the list are valid.	Required	Measure
Name_&_Version_Of_Scoring_Tool_Used	What is the name and version of the scoring tool used?	Provide the exact name and version number of the approved scoring tool, as listed by the UKAS-accredited body that approved the tool, used to calculate the savings for the measure. If a new, appropriate or alternative methodology has been used, the name of the scoring tool should be entered in this field. Where the scoring method is DS, N/A should be entered.	Alphanumeric	Max character length of 150 characters	Only entries in the accepted format are valid.	Required when: 'Scoring_Method' = NM, SAP or RdSAP	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
New_Methodology_ID	Where a new, appropriate or alternative methodology (NM) has been used, what is the reference number for that NM?	<p>If an NM has been used to calculate the savings of the measure, the reference number Ofgem allocated to this new, appropriate or alternative methodology must be provided. (Ofgem will provide a unique NM ID when a request is submitted to use a new, appropriate or alternative methodology).</p> <p>Measures scored using a NM that has not yet been approved will be placed on hold and review of the measures will be subject to the approval of that methodology.</p>	Alphanumeric	<p>AANNNN</p> <p>N/A</p>	Only entries in the accepted format are valid.	Required when: 'Scoring_Method' = NM	Measure
Annual_Cost_Saving_ (£)	What is the annual cost saving?	<p>Indicates the annual cost saving (in GBP£) achieved by the measure. This saving should be calculated in accordance with SAP or RdSAP or using an approved new methodology.</p> <p>Suppliers should not include the units ('£') when completing this field.</p>	Alphanumeric	<p>NNNNN.NN</p> <p>N/A</p>	Only entries in the accepted format are valid.	Required when: Scoring_Method = NM, SAP or RdSAP	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		Where the scoring method is DS, N/A should be entered.					
Lifetime_(yrs)	What is the lifetime of the measure?	<p>Indicates the expected lifetime of the measure.</p> <p>The ECO3 Measures Table provides a list of lifetimes and is available on our website.</p> <p>Where the scoring method is DS N/A should be entered.</p>	Alphanumeric	<p>NN</p> <p>N/A</p>	Only entries in the accepted format and as per the ECO3 Measures Table are valid.	Required when: Scoring_Method = NM, SAP or RdSAP	Measure
Cost_Score_(£)	What is the cost score for the measure?	<p>Where the scoring method is DS, refer to the deemed score matrix to identify the appropriate cost score for a measure.</p> <p>For measures scored using SAP, RdSAP or a NM, the cost score should be calculated as follows:</p> <p><i>Annual cost saving x Lifetime x Uplift (where applicable)</i></p> <p>See the ECO3 Guidance for further information.</p> <p>Suppliers should not include the</p>	Numeric	NNNNNN	Only entries in the accepted format are valid.	CORE	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		units ('£') when completing this field.					
Boiler_or_ESH_Warranty	Where the measure is the repair or replacement of a boiler or an electric storage heater (ESH), was the measure accompanied by a warranty?	<p>Indicates the length (in years) of the warranty.</p> <p>All boiler or ESH installations must be accompanied by a warranty of at least two years.</p> <p>All boiler and ESH repairs must also be accompanied by a warranty of at least two years. If a repair measure with a two year lifetime is being claimed, the warranty must be of at least two years.</p> <p>(TrustMark has a requirement that all ECO measures, except certain DHS measures, delivered by a TrustMark registered business must be accompanied by a guarantee of at least two years.).</p>	Alphanumeric	N NN N/A	Only entries in the accepted format are valid.	Required when: the measure type is associated with the Measure Category Boiler or ESH ²	Measure
Adequate_Roof_or_Wall_Insulation	Where the measure is a First Time Central Heating (FTCH) installation (including DHS	FTCH is only eligible if the premises being connected has adequate roof and wall insulation.	Alphabetic	Yes No N/A	Only entries corresponding to the list are valid.	Required when: Measure_Type is B_First_time_CH_[walltype] or	Measure

² There are a large number of measure types to list, please see the [ECO3 deemed score](#) matrix for further information

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
	installed as FTCH), does the premises have adequate roof and cavity wall insulation?	<p>'Yes' should be entered where FTCH is installed in a premises, including as a part of a DHS, and both roof and cavity wall pre-conditions are met i.e. all areas of roof or cavity wall present in the premises are insulated.</p> <p>Enter 'No' if the premises has areas of roof or cavity wall which cannot be insulated.</p> <p>'N/A' should be entered if the premises has no areas of roof or cavity wall.</p> <p>'N/A' should also be entered for DHS measures that aren't FTCH.</p> <p>For further information please refer to the ECO3 Guidance.</p>				DHS_new_connection.	
DHS_Consumer_Protection	Has the DHS measure been registered with an appropriate consumer protection organisation?	Where a DHS measure is installed, it must have appropriate consumer protection in place. This can mean registration with the heat networks consumer protection body Heat Trust or an equivalent organisation or standard.	Alphabetic	Heat Trust Equivalent N/A	Only entries corresponding to the list are valid.	Required when: Measure Type = DHS_new_connection OR DHS_CHP_upgrade	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>In such cases, suppliers should notify either Heat Trust or Equivalent.</p> <p>Registration with Heat Trust or an equivalent is not required when the DHS is a shared ground loop, with individual heat pumps in each property. In such cases suppliers should notify N/A.</p>					

Pre_Main_Heating_Source_for_the_Property	What was the fuel type of the main space heating system(s) for the premises before the measure was installed?	<p>Indicates the main space heating source of the premises prior to installation of the measure or, for heating measures, the heating source being replaced or repaired.</p> <p>Where the scoring method is DS, refer to Appendix 2 of this document for details on completing this field</p> <p>Some properties may be heated by a heating source not listed in Appendix 2. In such cases an appropriate heating source proxy should be used. This heating source must be accompanied by an asterix (*) to denote that a proxy has been used. Refer to Appendix 3 of this document for a list of these heating sources and the associated proxy.</p> <p>'DHS' can only be used where the measure is not scored using deemed scores. 'Other' can only be used where the measure is not scored using deemed scores and the heating source is not listed here.</p>	Alphabetic	<p>For measures where the scoring method is DS, as per the list of pre main heating sources in Appendix 2 and Appendix 3 of this document.</p> <p>For measures not scored with deemed scores 'DHS' and 'Other' are also acceptable.</p>	Only entries corresponding to the list are valid.	Required	Property / Person
--	---	--	------------	---	---	----------	-------------------

		ECO3 Guidance and the ECO3 measures table.					
Percentage_of_Measure_Installed	Has 100% of the measure been installed at the premises?	<p>Indicates whether 100% of all areas of the premises that are suitable for treatment with that measure have been treated.</p> <p>Ofgem require that suppliers must install 100% of a measure at a premises, unless there are reasonable grounds for not doing so. Further information on what constitutes 100% can be found in the ECO3 Guidance: Delivery.</p> <p>This field should be considered in conjunction with 'Percentage_of_Property_Treated'. There will be cases where they will not be the same, for example where a wall insulation measure is installed in a property made up of multiple wall types. Examples can be found in our ECO3 guidance.</p> <p>If the Measure Type is Solar PV, this field should be 'N/A'.</p>	Alphabetic	<p>Yes</p> <p>No</p> <p>N/A</p>	Only entries in the accepted format are valid.	Required	Measure

Percentage_Of_Property_Treated	What percentage of the property was treated with the measure?	<p>Indicates what percentage of the property has been treated by the measure. Where the scoring method is DS, this value determines the percentage of the overall deemed score which is claimed.</p> <p>This field should be considered alongside 'Percentage_of_Measure_Installed'.</p> <p>If 67% or more of the measure has been treated, '67+' can be notified here. Otherwise, the exact percentage of property treated must be notified.</p> <p>The only exception is Solar PV, where the percentage of property treated parameter is interpreted differently. Here, the exact POPT must always be notified for this measure type, as it is possible to notify up to 400%.</p> <p>Rounding should be carried out to the nearest whole number.</p> <p>Suppliers should not include the '%' symbol when completing this field.</p>	Alphanumeric	<p>NNN</p> <p>NNA</p> <p>N/A</p>	Only entries in the accepted format are valid.	Required when: 'Scoring_Method' = DS	Measure

Name_of_Uplift_For_DS	What Tier 1 deemed score uplift has been applied for this measure?	<p>In some circumstances, the scores for certain measures are subject to an uplift. Where the uplift is Tier 1 (cannot be used with an uplift in the same Tier – see ECO3 Guidance: Delivery), the name of the uplift should be entered in this field, and the version of the score which incorporates the uplift should be selected from the deemed scores matrix.</p> <p>All measures which are the replacement of a broken heating system under the cap should be notified with either the Broken_CH_cap_renew or Broken_ESH uplifts.</p> <p>If the heating system being replaced is no longer present in the property, the Broken_CH_cap_renew, Broken_CH_secondary, and Broken_ESH uplifts cannot be applied.</p> <p>If a boiler is replacing a non-boiler heating system the</p>	Alphanumeric	<p>LA_F&G_nonPRS_insulation</p> <p>LA_F&G_nonPRS</p> <p>Nonmainsgas_insulation</p> <p>broken_CH_cap_renew</p> <p>broken_CH_secondary</p> <p>Broken_ESH</p> <p>N/A</p>	Only Tier 1 entries in the accepted format are valid.	Required when: 'Scoring_Method' = DS	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>Broken_CH_cap_renew and Broken_CH_secondary uplifts cannot be applied.</p> <p>All insulation measures which are installed in a property with a non mains gas pre main heat source should be notified with the Nonmainsgas_insulation uplift, if a larger uplift is not available;</p> <p>Measures can also be eligible for an uplift when installed in certain properties under the LA flexible eligibility mechanism. See the ECO3 guidance for further information.</p> <p>If the property is not eligible for any of the Tier 1 uplifts, N/A should be entered</p>					
Uplift_For_Non_DS	What uplift has been applied for this measure?	An uplift will be included when calculating the cost score of some measures. If the measure has been scored using deemed scores, or no uplift is applied, then 'N/A' should be entered.	Alphanumeric	1.25 N/A	Only entries in the accepted format are valid.	Required when: 'Scoring_Method' = NM, SAP or RdSAP	Measure

Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		<p>If a DHS measure has been installed to an EPC band F or G property in a local authority declaration (which is not PRS), an uplift of 1.25 should be entered.</p> <p>You cannot combine uplifts.</p> <p>See the ECO3 Guidance for further information.</p>					
Installer_Name	What is the name of the installer company responsible for the installation?	<p>Provide the full name of the installer company that carried out the installation of the measure at the premises. This should not be the name of the managing agent unless they carried out the installation.</p> <p>In cases where a measure is referred to in PAS 2030 and the installation has been sub-contracted to a non-PAS certified installer, we require the name of the PAS certified installer's company to be notified</p>	Alphanumeric	Max character length of 150 characters	Only entries in the accepted format are valid.
