Dear Mike,

RIIO-ED2 Informal Licence Drafting Consultation – Distribution System Operation Incentive Governance Document

We welcome the opportunity to informally review and respond to the current working version of the DSO Incentive Governance Document for the RIIO-ED2 period. This public consultation is a key part of this development process to ensure that impacted DNOs and wider stakeholders have the opportunity to comment on the document, and we look forward to continued positive interaction with Ofgem to further develop the document ahead of the formal Statutory Consultation next month.

We recognise that time is tight for Ofgem to finalise this document whilst giving due consideration to all the representations made in response to this consultation, and as such offer our continued support to discuss our response in further detail should that be helpful.

We have, as requested, endeavoured to make our comments in issues log format along with our comments on defined terms in the attached Annex 1.

As always, this response should also be read in light of our previous correspondence on RIIO-ED2. If you have any questions relating to our response, please don't hesitate to contact me or Simon Brooke (simon.brooke@enwl.co.uk).

Yours sincerely,

PP

Paul Auckland
Head of Economic Regulation
