31 Oct 2023

## Quarterly Report

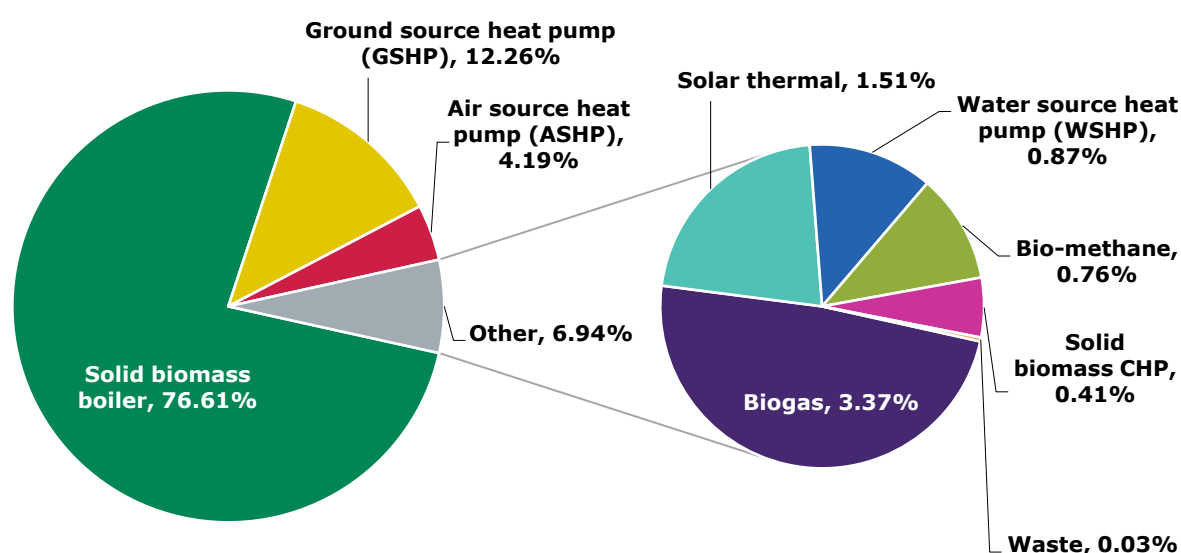

This is the Non-Domestic Renewable Heat Incentive (NDRHI) quarterly report, updating key scheme statistics and data to include the period from July 2023 to September 2023.

The NDRHI scheme closed to all entrants on 31 March 2023. Ofgem continues to process valid applications received before this deadline.

Historical data for the information presented in this report can be found on our website<sup>1</sup>.

**Figure 1: Proportion of accredited NDRHI installations by technology type to date**

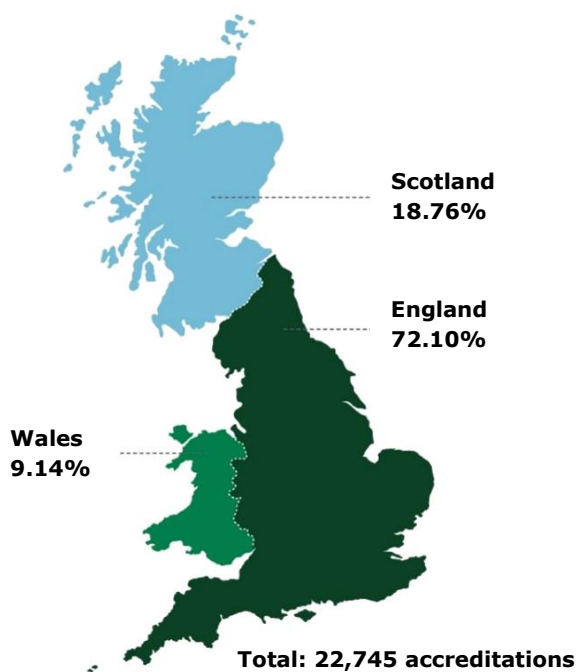

*This chart shows the proportion of accredited NDRHI installations by technology type. Solid biomass boilers make up 76.61% of installations, ground source heat pumps 12.26%, air source heat pumps 4.19%, while collectively, all other technologies account for 6.94%.*

<sup>1</sup> [NDRHI public reports and data](https://www.ofgem.gov.uk/environmental-programmes/non-domestic-rhi/contacts-guidance-and-resources/public-reports-and-data): <<https://www.ofgem.gov.uk/environmental-programmes/non-domestic-rhi/contacts-guidance-and-resources/public-reports-and-data>>

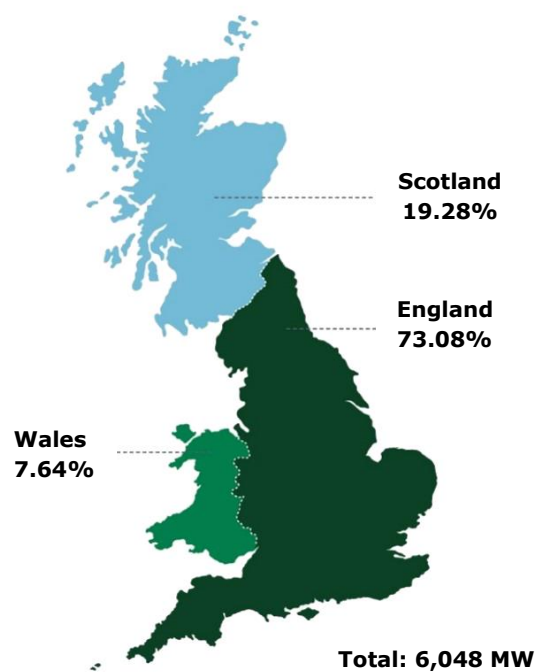

**Figure 2: Accredited installations and registered biomethane producers by country (%)**

*72.10% of installations are in England, 18.76% of installations are in Scotland, and 9.14% in Wales.*

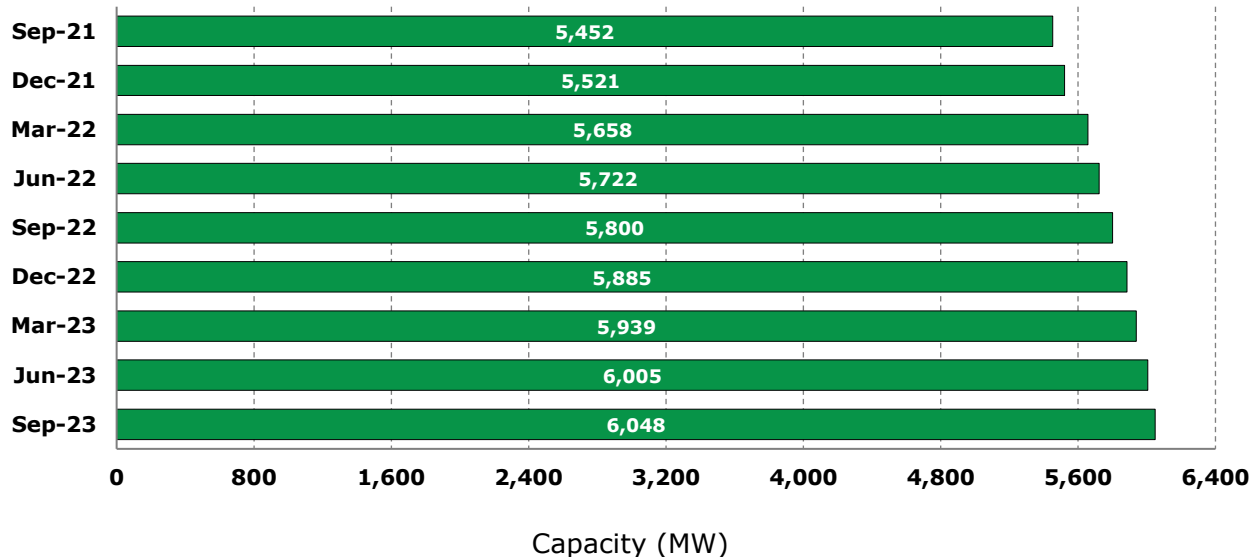

**Figure 3: Non-Domestic RHI total approved capacity by country (%)**

*73.08% of installed capacity is in England, 19.28% is in Scotland, and 7.64% in Wales.*

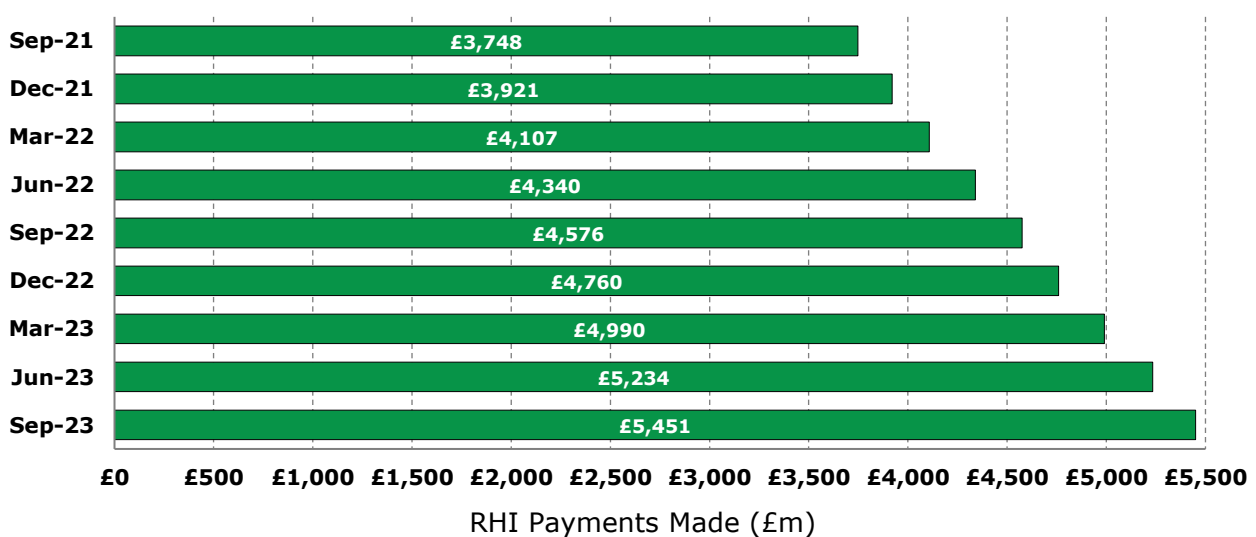

**Figure 4: Non-Domestic RHI total approved capacity – cumulative**

This chart shows the approved cumulative capacity of all active accreditations on the scheme. This includes full accreditations granted from June 2014, and all preliminary and full approvals granted prior to June 2014. Capacity reached 6,048 MW by the end of September 2023.<sup>2</sup>

**Figure 5: Non-Domestic RHI payments – cumulative**

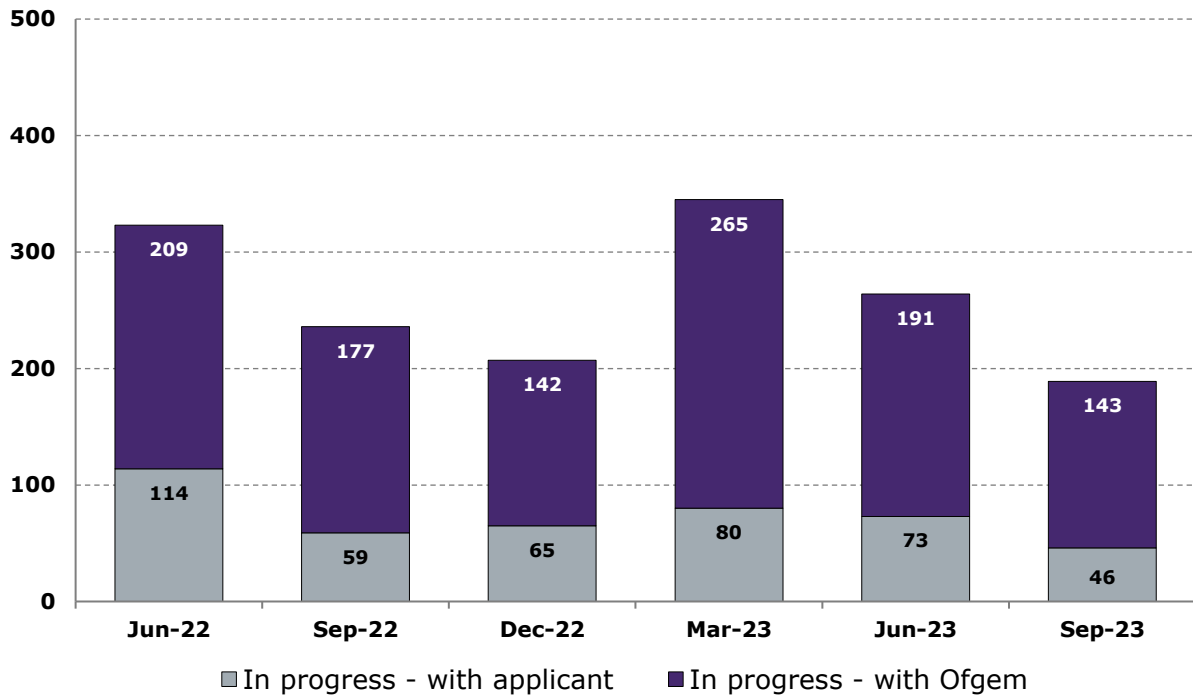

This chart shows the cumulative total of payments made to NDRHI installations, which reached £5.45 billion by the end of September 2023. Non-Domestic RHI payments are made based on quarterly heat data submitted by participants, with the first payments made in March 2012.

<sup>2</sup> An error in the way some accredited Tariff Guarantee applications were counted in previous reports led to an undercount in reported capacity. The error has now been rectified, meaning the numbers shown for previous quarters have changed from those previously reported.

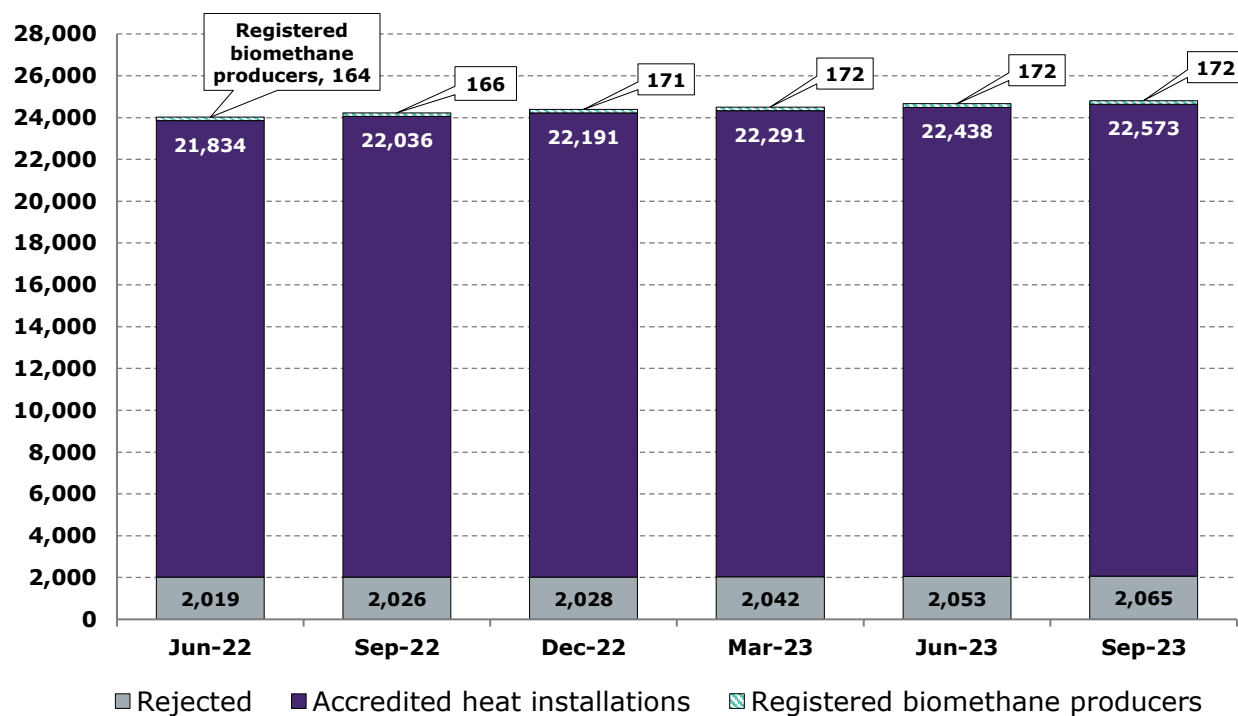

**Figure 6: Non-Domestic RHI applications in progress**

*This chart shows the number of applications in progress, and whether the application is with the applicant or with Ofgem. By the end of September 2023 there were 46 applications with applicants and 143 with Ofgem. The increase in applications in progress seen in March 2023 is due to a spike in applications received before scheme closure to all entrants.*

**Figure 7: Non-Domestic RHI application decisions – cumulative**

This chart shows the cumulative decisions made on applications to the Non-Domestic RHI scheme at quarterly intervals since June 2022. By the end of September 2023 there were 22,573 accredited heat installations, 172 registered biomethane producers and 2,065 rejected applications.<sup>3</sup>

## Further information

For more information [visit the Ofgem website](#)<sup>4</sup>. You will find information about the accreditation process and details about ongoing obligations.

If you can't find the information you need on our website, our customer service team will be happy to help on **0300 003 2289** or email [rhi.enquiry@ofgem.gov.uk](mailto:rhi.enquiry@ofgem.gov.uk).

### Press enquiries

For press enquiries please contact Ofgem's press office at [press@ofgem.gov.uk](mailto:press@ofgem.gov.uk).
