Dear Andrew,

### **Reviewing the Consolidated Segmental Statements – Our Final Proposals**

SSE Energy Supply Ltd welcome the opportunity to respond to the latest consultation of the Consolidated Segmental Statement proposals. Having reviewed the proposals, we do not have any significant concerns although we still believe that removing the requirement would be the best option. Therefore, it would be prudent for Ofgem to complete a post implementation review of the proposals within five years of the amended obligations to ensure these remain fit for purpose and achieve the intended objectives.

It is encouraging to note Ofgem have made changes to the proposals based on industry feedback, to the concerns raised regarding the calculation of thresholds and the removal of the generation activities on the template.

Should Ofgem wish to discuss any aspect of our response, we would welcome the opportunity.

Yours sincerely,

**Victoria Burkett**  
Regulation Manager
