

Internal Only

Below is my response to your consultation.

Starts

58% of business customers believe that energy prices are a threat to their business.

No [REDACTED] Sherlock. And the best ofgem can come up with after months of consulting.....better complaint handling and signing posting.

Are you a complete bunch of morons? How is a better compliant handling process and signing posting going to help with paying my business [REDACTED] gas and electricity bill?

What an utterly pointless, and total waste of resources. Is that is the best you can come up after months of statutory consultation. I could have come up with the same equally pointless suggestions after just 2 minutes. But I guess you idiots at ofgem need to justify your huge salaries.

Don't you appreciate how utterly [REDACTED] your responses are to any challenges in the energy sector.

Please ofgem, just give up, sack all your staff, turn the lights off, close the door and go home. Clueless morons.

Ends

Thanks [REDACTED]

Additional comment, sent at later date:

Can I ask how you think signposting businesses does anything to deal with the huge price increases? Suppliers are making billions in profits, when businesses and consumer customers are being screwed????
