Introduction

The Domestic Renewable Heat Incentive (DRHI) opened for applications on 9 April 2014 for consumers across England, Scotland and Wales who install eligible low-carbon heating technologies in their homes. The scheme closed to new applicants on 31 March 2022. This report details scheme activity in Quarter 4 of Scheme Year 10, covering the period February to April 2024.

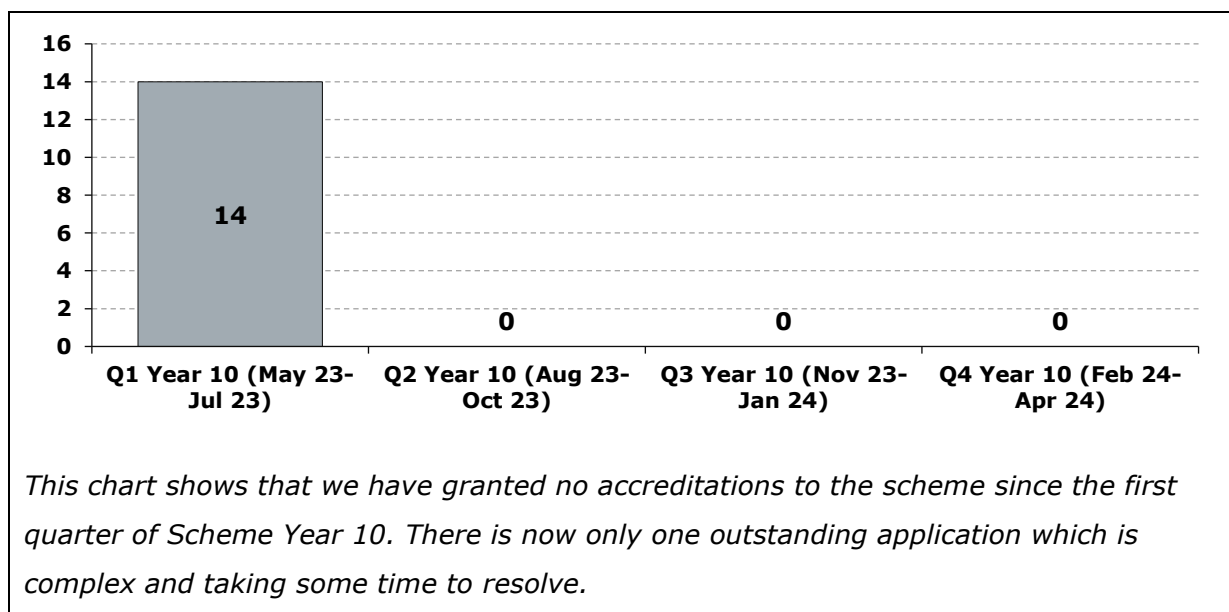

Accreditations¹

118,765*

**Total accreditations
supported on the DRHI
scheme**

*This figure includes 53,724 accreditations that have now reached the end of their seven-year support period on the DRHI and have exited the scheme.

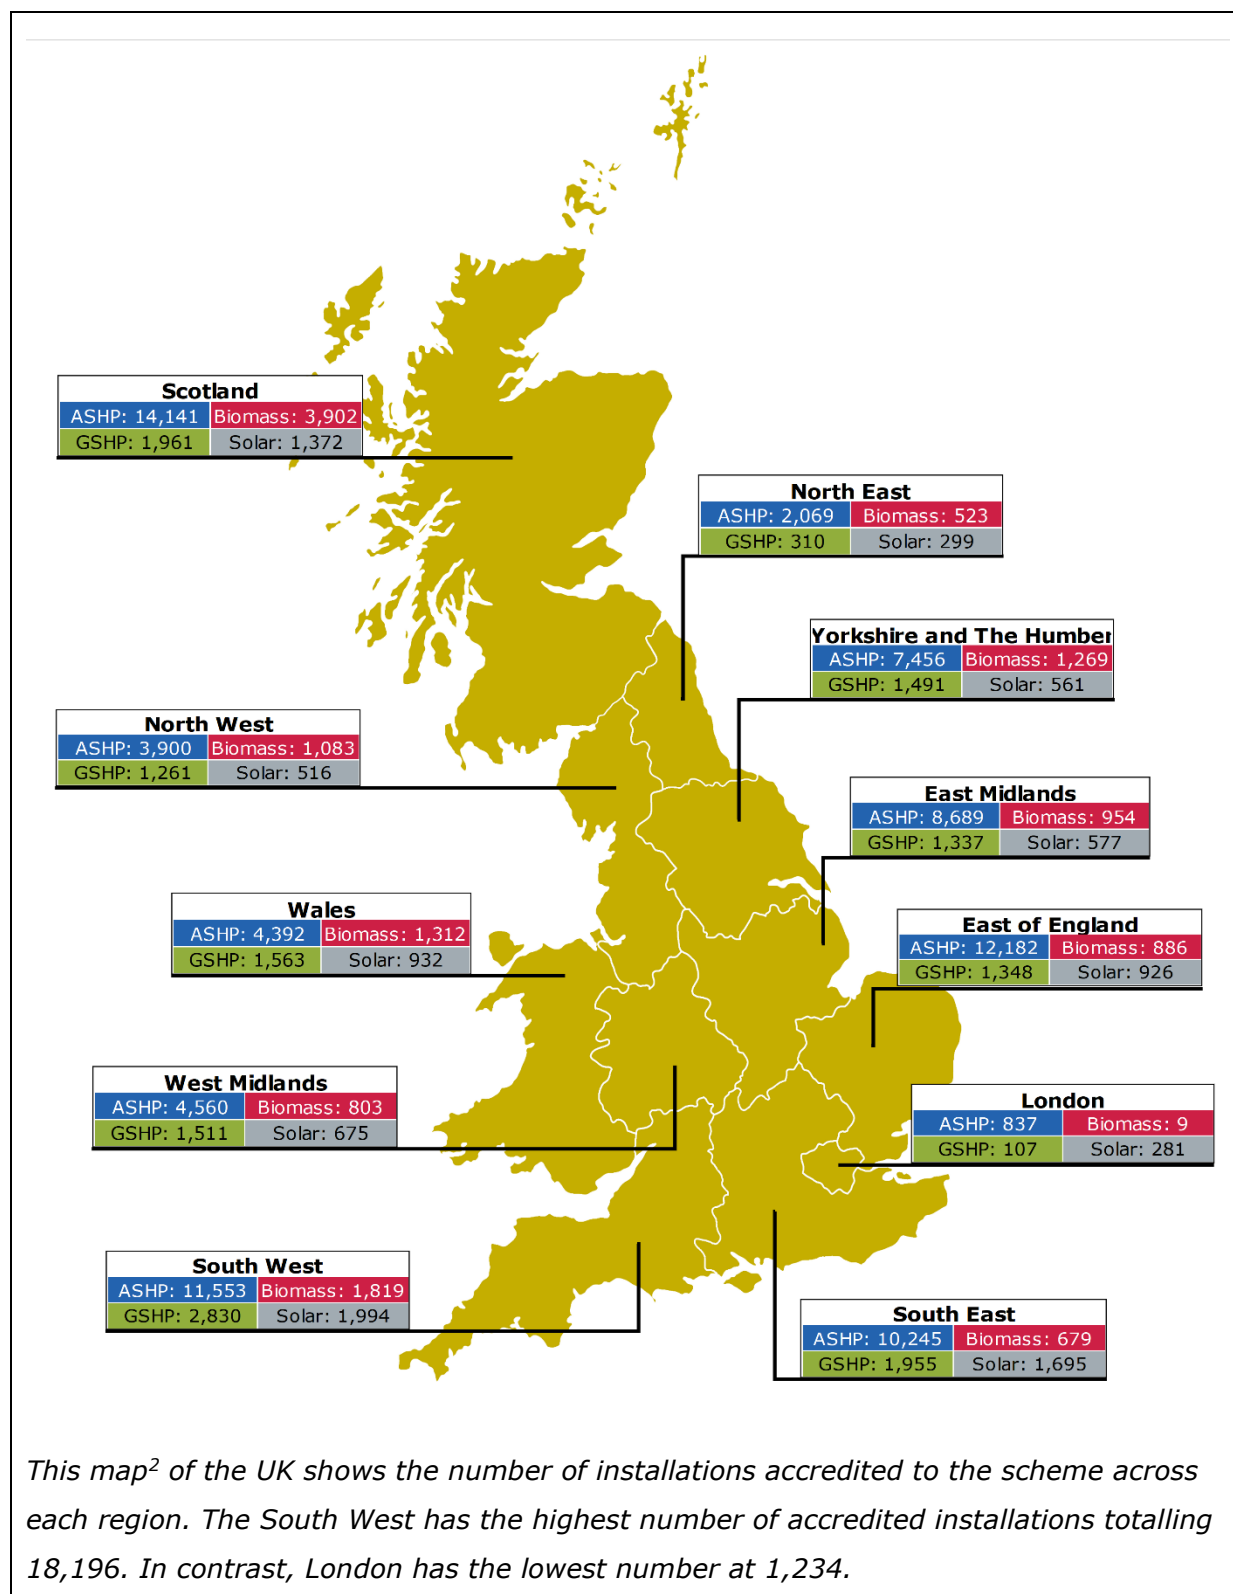

Figure 1: Accreditations per quarter between May 2023 and April 2024

¹ It should be noted the figures shown may differ from those previously reported for the following reasons. First, accreditation figures within the report do not include withdrawn or revoked accreditations (unless the accreditation was revoked as a result of failing to complete annual declarations). Second, where an application to transfer the ownership of an accredited installation is received, the installation will not appear as accredited until the eligibility of the transfer has been confirmed.

Figure 2: Total accreditations by region and technology type

Location	Air Source Heat Pump (ASHP)	Biomass	Ground source heat pump (GSHP)	Solar Thermal	Grand Total
South West England	11,553	1,819	2,830	1,994	18,196
East England	12,182	886	1,348	926	15,342
South East England	10,245	679	1,955	1,695	14,574
East Midlands	8,689	954	1,337	577	11,557
Yorkshire and The Humber	7,456	1,269	1,491	561	10,777
Highlands & Islands	5,992	1,382	585	574	8,533
Wales	4,392	1,312	1,563	932	8,199
West Midlands	4,560	803	1,511	675	7,549
North West England	3,900	1,083	1,261	516	6,760
Southern Scotland	4,475	1,103	410	177	6,165
East Scotland	2,171	921	580	406	4,078
North East England	2,069	523	310	299	3,201
North East Scotland	899	350	313	181	1,743
London	837	9	107	281	1,234
West Central Scotland	604	146	73	34	857
Grand Total	80,024	13,239	15,674	9,828	118,765

Figure 3: Regional distribution of accredited installations by technology type

² We have combined the Scottish regions on this map to create consistency with the way we report regional information across the schemes we administer. A breakdown of regional information for Scotland is still provided in Figure 2.

Payments Made to Date

Since the start of the scheme, accredited systems have generated approximately **8,907 GWh** of renewable heat.

The values of payments made for this heat generation (by technology type) are shown below. In total, **£81.3m** of these payments went to Registered Social Landlords.

Our Administration

Of the outstanding applications in the queue at scheme closure, **99.9%** have now been processed with just one application awaiting a decision.
