**Statutory Consultation on NGT's DSR Licence Condition**

Dear Mathew,

Thank you for the opportunity to respond to Ofgem's proposals to modify the DSR provisions in the NGT Licence. NGT supports the proposals, with two comments on the Licence drafting:

1. In the definition of 'Demand Side Response', the first reference to 'Uniform Network Code' should have a capital 'C' for 'Code'
2. If 'DMA Supply Point Component' is to be defined by reference to that term in the UNC then we consider that 'DMC Supply Point Component' should also be defined in this way for consistency.

If you have any queries about this, please contact me.

Regards
