Dear Company Secretaries and Stakeholders,

**Erratum Notice - Final Determinations on RIIO-2 re-opener applications 2024:
Electricity Transmission, Electricity Distribution and Gas Distribution**

In December 2024, we¹ published our Final Determination of our determined efficient cost allowance for re-opener application submissions we received in January 2024 from Electricity Transmission, Electricity Distribution and Gas Distribution network companies.²

It has come to our attention, however, that there are a number of minor errors contained in some of the published Final Determination documents (FD). It is therefore necessary to consolidate all the necessary changes as part of this housekeeping amendments to the relevant documents.

We have amended calculation errors relating to Cadent's Diversions and Loss of Development Claims Policy Re-opener and New Large Load Connections Re-opener allowances. This has resulted in an increase in allowance of £4.04m, details of which are set out in **Appendix 1**.

Attached to this letter in **Appendix 1**, is an error log setting out the identified errors and the amendments we made to correct them. Alongside this erratum notice, we have republished the relevant 'revised' Final Determination documents.

¹ References to the "Authority", "Ofgem", "we" and "our" are used interchangeably in this document. The Authority refers to GEMA, the Gas and Electricity Markets Authority. The Office of Gas and Electricity Markets (Ofgem) supports GEMA in its day to day work.
