**RIIO-2 NZASP Re-opener Draft Determinations: East Coast and Hyline Cymru
Hydrogen Network FEED Studies**

April 23, 2025

Dear Allan,

**Q2 Do you agree with our assessment of the Needs cases for the three East
Coast FEED studies?**

Yes. We support Cadent's proposed FEED study for the East Coast North project
which sits in an industrial area with high carbon intensity.

Our proposed Humber H₂ub @ hydrogen project is situated on our Killingholme Power
Station site at the eastern end of the proposed pipeline near Immingham. Humber H₂ub
@ (Green) is a HAR2 shortlisted project which is expected to supply the nearby Phillips
66 Humber Refinery with hydrogen.

There is potential to expand this project in the future and to develop a blue hydrogen
facility at the site to supply other hydrogen customers in the region. Cadent has
identified ten cornerstone users of hydrogen along their pipeline and we would be
interested in supplying these customers (subject to negotiations) in the future to support
decarbonisation of their sites.

Yours sincerely,

David Morris
