

Good afternoon Allan

By way of introduction, my name is Paul McDonald and I am the group engineering manager for Tayto Group LTD.

Clive and I have been working closely with [REDACTED] and [REDACTED] at [REDACTED] in reference to the hydrogen supply line. We have indicated that we'd like to have this at our Scunthorpe factory (DN16 1TT). We fully support this project as it aids us with Taytos sustainably objective to reduce scope 1.

Scunthorpe is our largest gas consumption site and this will give us a major reduction. Our current group CO2 is 19,500T or carbon and this will help reduce it dramatically.

Many thanks

Paul
