Distribution Flexibility Procurement Statement

1. Introduction

Aidien Limited (Aidien) is an Independent Distribution Network Operator (IDNO). We operate networks in all GB Distribution Network Operators' Service Areas.

This statement supports Aidien's Electricity Distribution Standard Licence Condition 31E: Procurement and use of Distribution Flexibility Services and is in a form approved by Ofgem.

2. Flexibility Services Requirements

As a new market entrant, expecting to qualify in April 2025, we have not identified any short- or medium term requirements to introduce flexibility on our networks and as a result, currently have no plans to procure flexibility services.

3. Tendering process

With no foreseen requirement for flexibility in the short or medium-term, we have no requirement for a tendering process at this time. Should this change in the future, robust processes will be developed accordingly.

4. Stakeholder engagement

With no foreseen requirement for flexibility in the short- or medium-term, we have no requirement for stakeholder engagement currently.

5. Detailed quantitative assessment

With no foreseen requirement for flexibility in the short or medium-term, we have no requirement for detailed quantitative assessment currently.

Yours sincerely,

Bernat Serra

Aidien Limited
