

Great British Insulation Scheme (GBIS)

Summary of Updates

GBIS Supplier Data Dictionary

This document summarises the updates contained in each version of the above publication.

Summary of Updates..... 1

Version 2.0.....2

Version 1.1.....3

Version 2.0

Publication date:	08 August 2025
-------------------	----------------

Version number:	2.0
-----------------	-----

The new version contains general formatting and drafting improvements as well as specific updates described below.

Field changes

In "Off_Gas" (field 16), the relevant date for determining a connection to the mains supply has been corrected from 30 to 31 March 2022.

In "PRS_SAP_Band_Exception" (field 24), the description incorrectly stated that this field was only relevant for the general eligibility group. This has been removed.

"Flat_Name/Number" (field 8) has been changed to an optional field.

Fields 25 and 33 state they are "Required when: 'Measure Type' = 'P&RT' OR 'TRV'". This has been updated to include smart thermostats as valid heating controls, in line with the mid-scheme amendment.

Removed "WHD Core Group" as a valid entry in "Verification_Method" (field 21)

Other changes

Corrected the maximum number of measures in an upload from 10,000 to 1000.

Removed line from introduction about notification of measures completed before 1 January 2024, as no longer relevant.

Added new paragraphs to the introduction referring to this summary of updates document

Moved links to other documents from footnotes to hyperlinks

Version 1.1

Publication date:	17 November 2023
-------------------	------------------

Version number:	1.1
-----------------	-----

The new version contains general formatting and drafting improvements as well as specific updates described below.

Field changes

Added 'N.N' and NN.N' as valid inputs in 'Starting SAP Rating' (field 13) to allow 1 decimal point.

Updated valid formatting in 'Date of Householder Eligibility' (field 31) from 'DD/MM/YY' to 'DD/MM/YYYY'.

Removed 'N/A' as a valid input in 'Installer Name' (field 34).

Clarified that 'TrustMark Business Licence Number' (field 36) can be a number with up to 12 digits, not 12 digits exactly.

Updated references to the supplier evidence eligibility route in fields 21, 29, 30 and 31 to match the exact name of the valid input: 'LI – Supplier Evidence'.

Other changes

Updated links to guidance documents on page 3 from draft guidance to final guidance.

Removed mentions of 'draft' guidance in 'Heating Source' (field 33). The table references are unchanged between draft and final guidance.

Changed wording slightly in the accepted format column for 'TrustMark Unique Measure Reference' (field 37) to be consistent with similar fields.

Making a positive difference
for energy consumers
