Dear Connections Team,

#### RES Response to CMP448 Minded to Consultation

RES is the world's largest independent renewable energy company, working across 24 countries and active in wind, solar, energy storage, green hydrogen, transmission, and distribution. An industry innovator for over 40 years, RES has delivered more than 27 GW of renewable energy projects across the globe and plans to bring more than 22 GW of new capacity online in the next five years.

As a service provider, RES has skills and experience in asset management, operations and maintenance (O&M), and spare parts – supporting 41 GW of renewable assets across 1,300 sites. RES brings to the market a range of purposeful, practical technology-based products and digital solutions designed to maximise investment and deployment of renewable energy.

RES wants to play an active part in the UK's energy future, ensuring our projects contribute to decarbonising the energy system at least cost to the consumer, in line with RES' vision to be a leader in the transition to a future where everyone has access to affordable zero carbon energy. We therefore welcome this opportunity to respond to **the CMP448 Minded to Consultation of 17 October 2025 ("the Consultation")**.

In response to the two questions posed, we agree with Ofgem's minded to position to approve the Original Proposal of CMP448 and we have no further comment to add at this stage. We think that all three options considered better facilitate Applicable CUSC Objectives (ACO) (i) and (ii) and that they are all neutral against ACOs (iii) and (iv). We agree that, of the three options considered, the Original Proposal best facilitates ACOs (i) and (ii).

Yours faithfully

Energy Networks Director
