Date: **13 February 2026**

All REGO Accredited Generating Stations

Dear Sir/Madam,

Northern Ireland Fuel Mix Disclosure 2026 - Renewable Energy Guarantees of Origin (REGOs)

We are contacting you, as a generator accredited under the Renewable Energy Guarantees of Origin (REGO) scheme, to make you aware of the Northern Ireland (NI) Fuel Mix Disclosure (FMD) deadline for licensed electricity suppliers of **31 March** every year. It is likely that your current electricity supplier is endeavouring to comply with the NI FMD deadline and may require you to transfer your REGOs to them to ensure that it is met.

If you are not required or do not intend to sell your REGOs to your supplier, then please ignore the information listed below and no further action is required.

What is Fuel Mix Disclosure?

Fuel Mix Disclosure is required by Article 3(6) of Directive 2003/54/EC, replaced by Article 3(9) of Directive 2009/72/EC. The transposing legislation in Ireland requires the Commission for Energy Regulation ("CER") to ensure suppliers provide reliable fuel mix information used to generate the electricity supplied annually, on all bills and promotional materials issued to customers. In Northern Ireland the transposing legislation requires that licenses issued by the Utility Regulator ("the UR") include a condition requiring compliance with Article 3(6). REGOs are the main evidence source used by licensed electricity suppliers to prove the proportion of renewable electricity supplied to their customers. As such, if you sell the renewable electricity you generated for the generation period of **1 January 2025 to 31 December 2025** to your supplier, they may also require you to transfer your REGOs for this generation period to them well in advance of their deadline of midday **31 March 2026**.

What is the disclosure period for 2026?

This disclosure period is **1 January 2025 to 31 December 2025**.

What do we expect generators to do?

- If you are still to **claim and transfer** REGOs for generation between **1 January 2025** and **31 December 2025** please do so as soon as possible. All claims and transfers of REGOs should be made via your account on the R&CHP Register, or the RER platform post launch (see below).

For the RER (Renewable Electricity Register) please follow the instructions in section 11 of the [Register User Guide](#) on how to submit output data and on how to transfer certificates. You will need to obtain the Renewable Electricity Register unique ID number of your supplier's account to complete the transfer transaction.

Please note: Requests made near to the supplier's deadline of **31 March 2026** cannot be guaranteed to be issued and transferred to the supplier's account on the R&CHP Register or the RER before the deadline. This may mean that you will not get paid for your REGO by the supplier you have an agreement with.

If you experience problems when requesting or transferring your REGOs please contact the **Fuel Mix Disclosure** team, in the first instance at REGOFuelMixDisclosure@ofgem.gov.uk.

Yours faithfully,

James Crawford
Head of Compliance
