## Introduction

The Boiler Upgrade Scheme (BUS) quarterly report provides information on applications, vouchers issued, grants paid, the scheme budget, and the installations supported. We provide this report in compliance with our obligations as set out in the Boiler Upgrade Scheme (England and Wales) Regulations 2022 (as amended).<sup>1</sup> This is the 15<sup>th</sup> BUS quarterly report since the scheme launched on 23 May 2022 and includes the period from 1 November 2025 until 31 January 2026.

As part of our obligations, we also publish a monthly update on our website<sup>2</sup> that provides cumulative statistics since the launch of the scheme, and a more detailed annual report<sup>3</sup> by 31 July each year.

## BUS Voucher Summary

This section provides information and statistics on the BUS voucher application and redemption processes. This also includes an overview of the scheme’s budget allocation relative to the annual budget.

### How does the BUS grant application work?

The BUS grant application is a 2-stage process as illustrated in the flow chart below. Firstly, installers are required to submit a voucher application (stage 1a) where we check if the pre-installation eligibility criteria are met. If the application is successful, we issue the voucher (stage 1b). Following commissioning of an installation the installer can submit a voucher redemption application (stage 2a). Once we have established that the remaining eligibility requirements have been met, the grant payment is made (stage 2b). For further information on the BUS application process please refer to our BUS guidance for installers<sup>5</sup>.

A summary of applications at stage 1 of the process can be found in **Figure 1**, and a summary of applications at stage 2 can be found in **Figure 2**. The overall budget allocation is derived based on the committed spend through vouchers issued at stage 1, in addition to provisional allocations of budget for stage 1 applications still in progress.

<sup>6</sup> Due to the way voucher applications are processed the numbers shown for previous quarters may have changed from earlier reports.

<sup>7</sup> Vouchers for air source heat pumps (ASHP) and biomass boilers are valid for 3 months. These figures do not include vouchers that were issued but have since expired, or those that have been revoked/withdrawn. Therefore, the figures for earlier quarters may have changed from previous reports.

<sup>8</sup> Due to the way voucher redemption applications are processed the numbers shown for previous quarters may have changed from previous reports.

<sup>9</sup> These figures include grants that have been paid out but have later been revoked or the payment value recouped as part of our audit and compliance process.

**Annual budget overview<sup>10</sup>**

Scheme budget is allocated based on the committed spend through vouchers issued at stage 1, in addition to provisional allocations for voucher applications still in progress. **Figure 3** presents budget data across the 4 scheme years, showing how allocated funds have been spent and what remains.

**Figure 3: Budget allocation and spending from each scheme year**

Period	Budget allocation	Budget spent	Budget unspent <sup>11</sup> / remaining
<b>Scheme Year 1</b> (May 2022 – Mar 2023)	£150,000,000	£50,009,000	£99,991,000
<b>Scheme Year 2</b> (Apr 2023 – Mar 2024)	£150,000,000	£88,410,500	£61,589,500
<b>Scheme Year 3<sup>12</sup></b> (Apr 2024 – Mar 2025)	£280,000,000	£188,845,000	£91,155,000
<b>Scheme Year 4</b> (Apr 2025 – Mar 2026)	£295,000,000	£244,337,500	£50,662,500

For Year 4 of the scheme the budget has been set at £295 million, with £244.3 million allocated so far between April 2025 and January 2026. This leaves £50.7 million remaining for the rest of the scheme year.

<sup>10</sup> Scheme years run from 1 April – 31 March and are not aligned with reporting quarters (1 February to 30 April, 1 May to 31 July, 1 August to 31 October, and 1 November to 31 January).

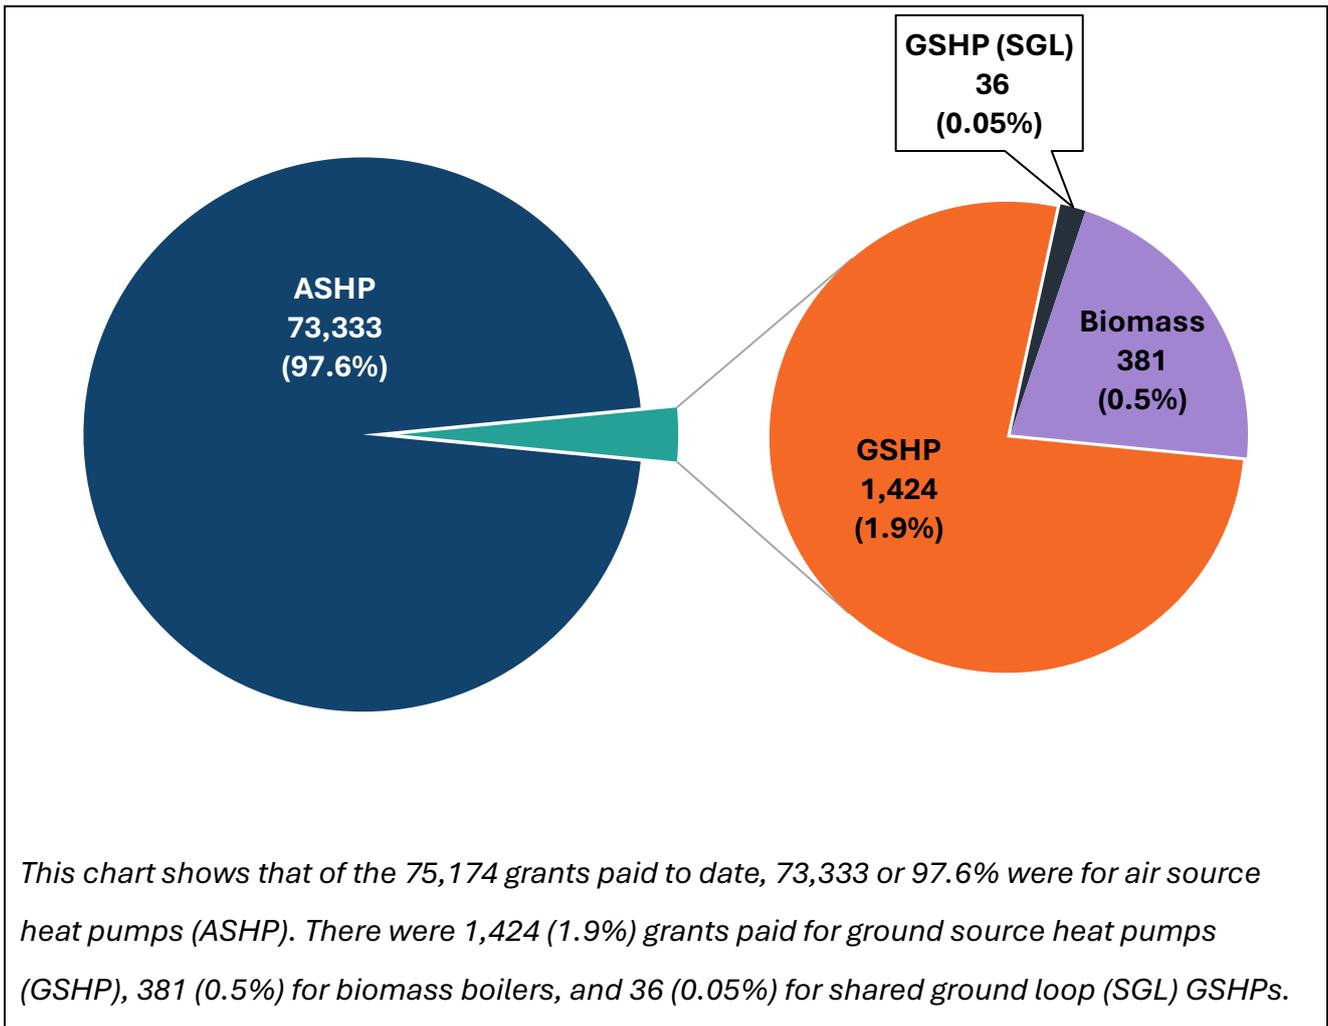

<sup>11</sup> N.B. Unspent budget is not carried over to the next scheme year.

<sup>12</sup> The Department for Energy Security and Net Zero (DESNZ) announced in November 2024 that an additional £30 million was available to ensure sufficient funding for Year 3, and on 30 January 2025, announced a further £25 million – increasing the total BUS Year 3 budget from £150 million to £205 million. Furthermore, to provide certainty that sufficient vouchers would be available during Year 3, the Secretary of State also gave permission for Ofgem to over-allocate vouchers up to a total of £280 million.

## Grants paid

This section provides information on installations for which grants have been paid (at the completion of stage 2) throughout the scheme’s lifetime. This includes a breakdown of grants paid by technology type, by region, and in terms of what heating system was replaced.

**Figure 7: Original heating system**

<sup>13</sup> New build properties are not eligible for the scheme except for certain ‘self-builds’. An eligible self-build must have been built mainly using the labour or resources of the first owner, and the new building must never have been owned by a business or organisation. Most self-builds are classed as not replacing an existing heating system (‘None’ category), as the grants are usually paid towards installations in newly constructed buildings or conversions of buildings without previous heating. However, a small proportion of self-builds were conversions where a non-domestic heating system was replaced. Therefore, the number of grants paid where no heating system has been replaced is lower than the number of eligible self-builds.
