

Introduction

This document provides a data dictionary and general information to help suppliers complete the Notification Templates for ECO4 projects and measures installed from 1 April 2022.

This document has been updated to reflect the amended end date of ECO4.

For further details on the updates contained in this version and previous versions of this publication, see the Summary of Updates. You can find it as a subsidiary document at the bottom of the website page hosting this document.

Background

In ECO4, notifications are separated into projects and measures, aligning with the lodgement process in TrustMark's Data Warehouse. A SAP or RdSAP assessment of the relevant property should take place before any measure installation commences and will form the basis of the project. For the purposes of notification to the ECO4 Register, a project consists of one or more ECO measures installed at a single property. Every measure must be attached to a project. Projects and measures each have their own notification template, with different fields.

The full project score for a completed project will be attached to the project. Partial project scores for completed measures will be attached to individual measures. It is intended for the project to be notified before any of the measures. A measure can be notified and successfully uploaded before the attached project but will not be processed until that project has been notified and

OFG1162

passed project validation checks. Once a project is complete (i.e. all measures to be installed have been completed and notified) suppliers should re-notify the project as a completed project re-notification containing end of project data such as the post-retrofit SAP rating. This is explained in further detail below.

This data dictionary sets out each of the fields to be completed on the supplier notification templates, the questions suppliers should be answering when completing the field, as well as an explanation of the information suppliers should provide. It then sets out the data field type required, the accepted format and validations involved for each field.

The supplier data dictionary also distinguishes between types of data that are provided in the Notification Template.

- Core Data: must be provided in order for a notification to be made. If core data is omitted or provided in a format other than the accepted format, the attempt to notify the measure will fail and it will not be accepted onto the register.
- Required Data: must be provided before we can process the notification. If this information is omitted or not provided in the correct format, the notification may still be made and be accepted onto the register, but we will be unable to process the notification.
- Optional Data: we request suppliers provide this in order to assist our validation and audit processes, and to assist suppliers should they later wish to transfer a measure to another supplier.

Suppliers should be aware that Ofgem's system cannot accept data unless notified in accordance with the accepted format as specified below. The accepted format is case sensitive and includes headings. As noted above, where core data is provided in a format other than the accepted format, the attempt to notify the measure will fail.

Ofgem will perform additional validations to check dependencies of mandatory fields and measure eligibility.

Some fields are only required to be filled in for projects that do not have a lodged RdSAP assessment with TrustMark. These are projects that consist solely of a District Heating Connection (DHC) measure (except those connected to a shared ground loop) and/or data light measures (DLM) and are therefore outside the scope of PAS 2035. For projects with a lodged RdSAP assessment these fields can be entered as N/A and they will be updated by the ECO Register.

Fields P30-P37 on the project notification template can be 'N/A' during an initial or edited notification, but require data to be entered when 'Purpose_of_Project_Notification' is set to 'Completed Project Notification'. These fields contain data that is only required after the project is complete in order to calculate a full project score. These fields are marked with 'completed project notification' in the overview column.

Submitting the notification template

- Format "A" - Alphabetic.
- Format "N" - Numeric.
- There is no required formatting for the file name.
- File should be submitted in .csv format.
- File should include the heading for each field.
- The contents of each field should follow the required formatting as described in this data dictionary.
- Projects and measures cannot be notified in the same file as the notification templates have different fields.
- The file can contain details of multiple measures or projects.
- There is a limit of 5000 notifications per file. This applies to both measure and project notifications.
- When a field is not applicable, or not required for your notification (as indicated by the 'required when' statement in the 'Mandatory' column), it should be populated with 'N/A'.

Whilst legislative deadlines are on a monthly basis, we would encourage measures and projects to be submitted as they are completed rather than in single monthly batches. Whilst some manual processes remain, this should ultimately reduce timescales for approval.

For more information on the notification process and the requirements notifications must meet to be eligible, see the [ECO4 Delivery Guidance](#) and [ECO4 Supplier Administration Guidance](#).

Project notification template

Table 1: Project template data dictionary

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P1	ECO_Supplier_Reference	What is the ECO supplier reference number of the supplier that owns the project?	<p>This refers to the unique ECO supplier reference number allocated to every obligated supplier by Ofgem. The letters at the beginning are an assigned acronym identifier for the company name. The numeric characters following that are the licence-holder's company registration number and the final letter denotes the licence type, E = Electricity, G = Gas.</p> <p>This entry identifies the supplier whose obligations the project and associated measures will be credited towards. The ECO supplier reference number that is provided must be for the supplier that owns the project. In relation to transferred projects, this will be the supplier that is the 'buyer'.</p>	Alpha-numeric	AAANNNNNN NNA AAAAANNNNN NA	<p>The reference number must be a valid supplier reference.</p> <p>Only entries in the accepted format are valid.</p>	CORE	Supplier

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P2	Project_Reference_Number	What is the unique project reference number (PRN) that the supplier has generated for this particular project?	<p>This is the unique reference number generated by the supplier and ascribed to the project being notified. This allows the project to be identified by both suppliers and Ofgem.</p> <p>The P indicates a project. The three letters are an assigned acronym identifier for the company name. The following seven numbers should be generated by the supplier.</p>	Alpha-numeric	P-AAANNNNNN	Only entries in the accepted format are valid.	CORE	Project
P3	Trustmark_Project_Reference_Number	If the project is registered with TrustMark, what is the TrustMark unique project reference?	<p>When a project is lodged with TrustMark a unique TrustMark project reference will be generated. Supplier must have this number before notifying the project to Ofgem.</p> <p>This should only be N/A where no measures in the project will be lodged with TrustMark. Measures will not pass validation checks if they are a measure type covered by PAS 2035 but no TrustMark Project reference number (TM PRN) has been entered for the project.</p>	Alpha-numeric	ANNNN ANNNNN ANNNNNN ANNNNNNN N/A	Only entries that match with TrustMark's Data warehouse are valid.	Optional, but should only be 'N/A' when no measures to be installed are covered by PAS2035.	Project

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P4	Purpose_of_Project_Notification	What is the purpose of this submission?	<p>This indicates the reason for notifying the project.</p> <p>'New Notification' should be entered when notifying a project for the first time.</p> <p>'Edited Notification' should be entered when an existing project is being amended and the project is re-notified, except in cases where the project is being notified as complete.</p> <p>'Completed Project' should be entered when an existing project is being re-notified to signify a project is complete and provide the required end of project details.</p>	Alphabetic	<p>New Project Notification</p> <p>Edited Project Notification</p> <p>Completed Project Notification</p>	Only entries corresponding to the list are valid.	Required	Project
P5	Building_Number	Where relevant, what is the number of the building in which the project took place?	Provide the number of the building (if applicable).	Alpha-numeric	Max character length of 50 characters	Only entries in the accepted format are valid.	CORE when: 'Building_Name' is unavailable	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
	Building_Name	Where relevant, what is the name of the building in which the project took place?	Provide the name of the building (if applicable).	Alpha-numeric	Max character length of 100 characters	Only entries in the accepted format are valid.	CORE when: 'Building_Number' is unavailable	Property / Person
P6	Flat_Name /Number	Where relevant, what is the name or number of the flat in which the project took place?	Provide the name or number of the flat (if applicable). The word 'Flat' should be entered where appropriate (e.g. 'Flat 1'). If not entered in this field, the flat name/number should be provided in "Building_Name" instead.	Alpha-numeric	Max character length of 50 characters	Only entries in the accepted format are valid.	Optional	Property / Person
P7	Street_Name	What is the name of the street on which the premises is located?	Provide the name of the street on which the premises is located (if applicable). In-fill houses must be located on the same (named) street as the projects containing the primary premises, therefore, this field is required for the notification of an in-fill house. Similarly, in-fill flats must be in the same building as the primary measure, so street name is required to verify this.	Alpha-numeric	Max character length of 50 characters	Only entries in the accepted format are valid.	Required when: 'Eligibility_type' = 'In_fill' and 'Property' = 'House' or 'Flat'	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P8	Town	What is the name of the town or city in which the premises is located?	Please provide the name of the town in which the property is located.	Alpha-numeric	Max character length of 50 characters	Only entries in the accepted format are valid.	CORE	Property / Person
P9	Post_Code	What is the postcode for the premises?	Please provide the full Royal Mail postcode corresponding to the address provided.	Alpha-numeric with / without 'Space'	AN NAA ANN NAA AAN NAA AANN NAA ANA NAA AANA NAA	Postcodes with and without spaces will be accepted. Only entries in the accepted format are valid.	CORE	Property / Person
P10	Unique_Property_Reference_Number_(UPRN)	What is the UPRN for the premises?	Provide the unique property reference number that is the unique twelve-digit number assigned to every unit of land and property by the National Land and Property Gazetteer and recorded by local Government.	Alpha-numeric	NNNNNNNNN NNN N/A	Numeric entries must be 12 digits. Only entries in the accepted	Optional	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>Suppliers are encouraged to submit this data where it is available as standard.</p> <p>Where the UPRN is fewer than 12 digits, the UPRN should be preceded by enough '0's to total 12 digits. For example, an 8-digit UPRN should be notified as '0000NNNNNNNN'.</p> <p>'N/A' may be entered where the UPRN is unknown.</p>			format are valid.		
P11	Pre_Assessment_Methodology	What method was used to obtain the pre-retrofit SAP rating?	<p>All ECO4 projects must have a pre-retrofit SAP or RdSAP assessment carried out. Where the assessment is RdSAP, it can either be lodged with TrustMark ('TM - RdSAP') or as an EPC ('EPC - RdSAP'). Full SAP assessments may only be lodged as an EPC.</p> <p>Which assessment is required depends on the measures to be installed in that project. Where a project is to consist of a district heating connection alone and the connection is not a shared ground loop GSHP, then a full SAP assessment lodged</p>	Alphabetic	EPC - SAP EPC - RdSAP TM - RdSAP	Only entries corresponding to the list are valid.	Required	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>as an EPC is required. Where a project is to consist of a district heating connection which is not a shared ground loop GSHP and novel data light measures only, a full SAP assessment lodged as an EPC is also required. Where the project will consist only of one or more novel data light measures, an RdSAP assessment lodged as an EPC is required.</p> <p>In all other cases, an RdSAP assessment should be carried out and lodged with Trustmark.</p> <p>Measures that are installed in this project may generate errors if the measure type does not meet the above criteria, e.g. if a supplier notified a loft insulation measure in a project with 'EPC – SAP' in this field.</p> <p>Please see the ECO4 Delivery Guidance for more details on when a SAP or RdSAP assessment is required.</p>					

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P12	Pre_Retrofit_Assessment_Reference	What is the reference number of the pre-retrofit assessment?	<p>Please include the reference number of the pre-retrofit assessment where the assessment has been lodged as an EPC.</p> <p>A reference number is not required where the pre-retrofit assessment is lodged with Trustmark.</p>	Numeric	NNNN-NNNN- NNNN-NNNN- NNNN N/A	<p>Only entries corresponding to the list are valid.</p> <p>The format must be correct for the notified pre-retrofit assessment methodology.</p>	Required when: 'Trustmark_Project_Reference_Number' = 'N/A'	Property / Person
P13	Starting_SAP_Rating	What was the SAP rating in the property before the project started?	The starting SAP rating should be taken from the pre-retrofit assessment and is required for determining both the eligibility of the property and measures installed within it, as well as calculating partial and full project scores.	Alpha-numeric	N N.N NN NN.N	<p>Numeric entries must be between 1 and 100.</p> <p>Up to 1 decimal place is allowed.</p>	Required	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P14	Floor_Area	What is the internal floor area of the property in m ² ?	To calculate scores the internal floor area of the property must be notified. This should be taken from the pre-retrofit assessment.	Numeric	N NN NNN NNNN	Only entries in the accepted format are valid. Max 4 characters	Required	Property / Person
P15	Rural_Output_Area	If the property is in a rural area, what is the OA code in which the premises is located?	For properties in rural areas, please provide the code for the Output Area (OA) in which the premises is located. For non-rural properties enter 'N/A'. For more information on OAs please see the ECO4 Delivery Guidance.	Alpha-numeric	ANNNNNNNN N/A	Only entries in the accepted format are valid.	Optional	Property / Person
P16	On_Gas	Was the property connected to the gas grid on 31 March 2022?	Please state if the premises was connected to the mains supply of a relevant gas transporter on 31 March 2022. If the property was not connected on 31 March 2022, select 'Off Grid'.	Alphabetic	On Grid Off Grid N/A	Only entries in the accepted format are valid.	Required	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P17	Private_Domestic_Premises	Did the project take place at a private domestic premises?	Indicates whether the premises is generally not owned and/or let by a social landlord. For further information on the definition of private domestic premises, please refer to the ECO4 Delivery Guidance.	Alphabetic	Yes No	Only entries corresponding to the list are valid.	Required	Property / Person
P18	Tenure_Type	What is the tenure of the premises?	Provide a description of the tenure of the premises. Please see ECO4 Delivery Guidance for details on how tenure impacts eligibility. Note PRS = 'private rented sector'	Alphabetic	Owner Occupied PRS Social Housing (RSL)	Only entries corresponding to the list are valid.	Required	Property / Person
P19	Property	What type of property is the premises?	Please provide the type of premises the measure was installed to.	Alphabetic	House Flat Park Home	Only entries corresponding to the list are valid.	Required	Property / Person
P20	Eligibility_Type	What is the ECO eligibility route?	Indicates how the customer or premises has been targeted and deemed eligible for ECO.	Alphabetic	Help to Heat Group Social Housing	Only entries corresponding to the list are valid.	CORE	Eligibility

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			For further information on the various routes to eligibility, please refer to the ECO4 Delivery Guidance.		LA Declaration Supplier Evidence In-fill			
P21	Verification_Method	How has the chosen eligibility type been determined?	<p>For further information on how to identify whether a person is eligible for the scheme, please refer to the ECO4 Delivery Guidance.</p> <p>Where the property is eligible through the help to heat group (HTHG), the below options apply:</p> <p>A data link exists with the Department of Work and Pensions (DWP) so that help to heat group eligibility can be verified through a data matching exercise. Suppliers should enter 'DWP Match' for measures where HTHG eligibility has been verified using this method.</p> <p>Only suppliers that have signed up to the ECO Eligible Referrals (EER) route with</p>	Alphabetic	DWP Match ECO Eligible Referral HTHG Benefit Letter Self Declaration PPM Non-PPM Flex Route 4 Other	Only entries corresponding to the list are valid. 						assessment methodology.		
P32	Finishing_SAP_Rating	What was the SAP rating in the property after the project ended?	<p>The finishing SAP rating is taken from the post-retrofit assessment and is required for determining if the minimum requirement has been met and, if it has, calculating the final project score.</p> <p>Note that suppliers should not include any deemed SAP improvements for relevant measures in this value. The notified value should be the rating taken from the SAP assessment and the register will add any deemed SAP improvements.</p> <p>This field should not change to account for any measures rejected for an admin reason. Instead the 'Rejection_Adjusted_Finishing_SAP_Rating' field should be filled in separately with the adjusted value.</p>	Alpha-numeric	N N.N NN NN.N N/A	<p>Numeric entries must be between 1 and 100.</p> <p>Up to 1 decimal place is allowed but not required</p>	Required when: 'Purpose_of_Project_Notification' = 'Completed Project Notification'	Completed project re-notification

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P33	Completed_Project_Trustmark_Cert_ID	What is the ID number of the completed project certificate?	TrustMark will award a completed project certificate to a project lodged with them once it is complete. The reference number of the certificate must be notified with a completed project re-notification to prove the project is complete.	Alpha-numeric	ANNNN-A ANNNNN-A ANNNNNN-A ANNNNNNN-A N/A	Only entries in the accepted format are valid.	Required when: 'Purpose_of_Project_Notification' = 'Completed Project Notification' AND 'Trustmark_Project_Reference_Number' ≠ 'N/A'	Completed project re-notification
P34	Measures_in_Project	How many measures were completed in this project?	Please provide the number of measures that have been completed and notified in this project. We use this to verify that all measures that should be notified have been. Note this count should not include any exempt notifications. This is a count only of measures that were completed. If there were measures planned for the project but not completed and notified to Ofgem they should not be included in this count.	Alpha-numeric	N NN N/A	Only entries in the accepted format are valid. Number must be between 1-99.	Required when: 'Purpose_of_Project_Notification' = 'Completed Project Notification'	Completed project re-notification

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
P35	Exemption_from_MR	Is the supplier requesting an exemption from the minimum requirement?	<p>Starting SAP band E, F, or G projects may be able to achieve a full project score even if the minimum requirement (MR) is not met, where either:</p> <ol style="list-style-type: none"> 1. One or more measures required to meet the MR attracted an exemption and could not be installed 2. There is no possible combination of eligible ECO4 measures that would meet the MR <p>Suppliers should use this field to indicate they request an exemption from the MR for either of the above scenarios. These projects will count towards the exemptions cap.</p> <p>Important Note: By requesting an exemption from the MR through this field, suppliers declare that no other combination of eligible ECO4 measures would have resulted in a higher finishing SAP rating for property. Where we find</p>	Alphabetic	<p>Exempted measure</p> <p>No eligible combination</p> <p>N/A</p>	Only entries corresponding to the list are valid.	<p>Optional</p> <p>Entries other than N/A should only be notified where 'Purpose_of_Project_Notification' = 'Completed Project Notification'</p>	Completed project re-notification

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>this to be false, the exemption may be revoked.</p> <p>Suppliers should notify exempt measures using the measure notification template. See the relevant fields in that section for more details on exemption categories and evidencing.</p>					
P36	Consumer_Circumstances	Was the project ended early by the consumer?	<p>Starting SAP band E, F, or G projects may be able to achieve a full project score even if the minimum requirement is not met if the consumer chose to end the project early.</p> <p>Please use this field to indicate where this occurs and to request an exemption from the MR.</p> <p>If the project was ended due to a death in the household or a change in occupancy, this should be entered. Suppliers should be able to provide a death certificate or tenancy agreement to evidence this, respectively.</p>	Alphabetic	<p>Change of occupancy</p> <p>Death in household</p> <p>Other</p> <p>N/A</p>	Only entries corresponding to the list are valid.	Optional Entries other than N/A should only be notified where 'Purpose_of_Project_Notification' = 'Completed Project Notification'	Completed project re-notification

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			In all other scenarios, suppliers should contact Ofgem in advance of notifying the completed project to discuss the consumer circumstances and suitable evidence that may be provided. If approved, suppliers should notify this as "Other"					
P37	Rejection_Adjusted_Finishing_SAP_Rating	What was the SAP rating in the property after the project ended, excluding any measures that have been rejected for an admin reason?	<p>Rejected measures should not be counted towards a properties finishing SAP rating.</p> <p>Where a measure is functioning in the property but has been rejected from the ECO scheme for an administrative reason it may still have been included in the finishing SAP rating recorded in the post-retrofit assessment, therefore suppliers should use this field to notify the finishing SAP rating adjusted for any administrative rejections (such as a late notification without an extension).</p> <p>In such cases the 'Finishing_SAP_rating' field should still be populated:</p>	Alpha-numeric	N N.N NN NN.N N/A	Numeric entries must be between 1 and 100. Up to 1 decimal place is allowed but not required	Required when: 'Purpose_of_Project_Notification' = 'Completed Project Notification' AND the project contains at least one measure that has rejection category of 'admin rejection'	Completed project re-notification

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<ul style="list-style-type: none"> • 'Finishing_SAP_Rating' should contain the rating taken from the post-retrofit assessment • 'Rejection_Adjusted_Finishing_SAP_Rating' should contain the rating that has been lowered to exclude any measures rejected for an administrative reason. <p>Where there are no such rejections this field should be entered as 'N/A'</p> <p>Note that this adjusted SAP rating should never be greater than the 'Finishing_SAP_Rating'</p>					

Measure notification template

Table 2 contains information on the fields in the measure notification template suppliers should use to notify completed measures in ECO4.

Exempt measures

There are cases where a potential measure has been evaluated but deemed ineligible for installation as the measure attracts one of a set list of exemptions eg. The property is a listed building. Where a measure could not be installed due to an exemption, it can impact the off-gas hierarchy, insulation requirements for heating measures, and may result in a project being exempt from the minimum requirement for SAP improvements. The Register needs a way of determining when a measure hasn't been installed due to exemption, so suppliers should also use the measure template to notify exempt measures. The notification of an exemption is required only where there is a specific purpose for an exemption in the ECO4 project. If a supplier is not seeking an exemption from scheme requirements, for example the minimum requirement for SAP improvements, an exempt measure does not need to be notified, even if it is included in the assessment.

As exempt measures have not been installed, the majority of the fields on the measure template are not relevant and may be entered as N/A. Only five fields are required: 'Measure_Reference_Number', 'Project_Reference_Number', 'Measure_Type', 'Purpose_of_Notification' and 'Exemption_Category'. They have no installation date and therefore no notification deadline. Exempted measures are distinguished through the 'purpose of notification' field. See chapter 4 of the [ECO4 Delivery Guidance](#) for more detail on exemptions.

Table 2: Measure template data dictionary

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
M1	Measure_Reference_Number	What is the unique measure reference number that the supplier has generated for this particular measure?	<p>This is the unique reference number generated by the supplier and ascribed to the measure being notified. This allows the measure to be identified by both suppliers and Ofgem.</p> <p>The first three characters are an assigned acronym identifier for the company name. The following numbers should be generated by the supplier.</p> <p>This reference number must be unique across ECO1, ECO2, ECO2t, ECO3 and ECO4.</p>	Alpha-numeric	AAANNNNNN N AAANNNNNN NN	Only entries in the accepted format are valid.	CORE	All
M2	Project_Reference_Number	What is the reference number of the project of which this measure is a part?	<p>Every measure in ECO4 must be associated with a project. For notification purposes in-fill measures should also be notified as part of their own project.</p> <p>This field is how measures are attached to projects. The notified PRN should belong to an already existing PRN on the ECO4 register.</p>	Alpha-numeric	P- AAANNNNNN N	<p>Only entries in the accepted format are valid.</p> <p>Listed project must already have been</p>	Required	All

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			The P indicates a project. The three letters are an assigned acronym identifier for the company name. The following seven numbers should be generated by the supplier.			notified to Ofgem.		
M3	Measure_Type	Which measure was installed at the premises?	<p>This describes the measure type installed at the premises (each measure installed is to be reported in a separate row).</p> <p>For exempt notifications, this describes the measure type that could not be installed as it attracts an exemption</p> <p>When completing this field, refer to the ECO4 Measures Table published on our website. This sets out the 'Measure Name: format for notification to Ofgem'.</p> <p>Measures need to be notified in the exact naming convention specified in the ECO4 Measures Table under 'Measure Name: format for notification to Ofgem'.</p>	Alpha-numeric	As per the advised list of measures in the ECO4 Measures Table	Only entries corresponding to those in the ECO4 Measures Table are valid.	CORE	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
M4	Purpose_of_Notification	What is the purpose of this submission?	<p>This indicates the reason for notifying the measure.</p> <p>'New Notification' should be entered when notifying a measure for the first time, provided it is not subject to an extension request or to be included as part of the supplier's auto late quota.</p> <p>'Edited Notification' should be entered when an existing notification is being amended and the measure is re-notified.</p> <p>'Extended Notification' should be entered when the measure has an approved extension request associated with it.</p> <p>'Automatic Late Extension' should be entered when the measure is being notified after its Notification Period and falls within a supplier's 5% automatic late extension quota.</p> <p>Either 'New Exemption or 'Edited Exemption' should be entered when the</p>	Alphabetic	<p>New Notification</p> <p>Edited Notification</p> <p>Extended Notification</p> <p>Automatic Late Extension</p> <p>New Exemption</p> <p>Edited Exemption</p>	Only entries corresponding to the list are valid. No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			notification is for an exempt measure rather than a completed measure.					
M5	Date_of_Completed_Installation	On what date was the installation of the measure completed?	<p>The date of completed installation (DOCI) indicates the date on which the installation of the measure was 'complete'. Please refer to the ECO4 Delivery Guidance for information on how this date is determined.</p> <p>N/A should be entered only for exemptions. All completed measures should have a DOCI.</p>	Date Field	DD/MM/YYYY N/A	<p>Only DOCI between 01/04/2022 and 31/12/2026 (inclusive) are valid.</p> <p>Only entries in the accepted format are valid.</p>	CORE unless 'Purpose_of_Notification' = 'New Exemption' or 'Edited Exemption'	Overview
M6	PPS_Type	What type of scoring method is used for the Partial project score?	<p>Indicates whether the measure is a regular ECO4 measure type (PPS), a data light measure (DLM) or a standard alternate methodology (SAM).</p> <p>N/A should be entered only for exemptions. All completed measures should have a scoring type.</p>	Alphabetic	PPS DLM SAM N/A	<p>Only entries corresponding to the list are valid.</p>	Required unless 'Purpose_of_Notification' = 'New Exemption' or 'Edited Exemption'	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
M7	Percentage _Of_Property_Treated	What percentage of the property was treated with the measure?	<p>Indicates what percentage of the property has been treated by the measure.</p> <p>If 67% or more of the measure has been treated, '67+' can be notified here. Otherwise, the exact percentage of property treated (POPT) must be notified.</p> <p>The only exception is Solar PV, where the POPT parameter is interpreted differently. Here, the exact POPT must always be notified for this measure type, as it is possible to notify up to 400%.</p> <p>Rounding should be carried out to the nearest whole number.</p> <p>Suppliers should not include the '%' symbol when completing this field.</p>	Alpha-numeric	N NN NNN 67+ N/A	Only entries in the accepted format are valid.	Required unless 'Purpose_of_Notification' = 'New Exemption' or 'Edited Exemption'	Measure
M8	Consumer _Protection	Where relevant, has the measure been registered with an appropriate consumer	Where a District Heating Connection (DHC) is installed, it must have appropriate consumer protection in place. This can mean registration with the heat networks consumer protection body Heat	Alphabetic	Heat Trust HT Equivalent TM Equivalent N/A	Only entries corresponding to the list are valid.	Required when: 'Measure Type' belongs to the DHC or DLM measure categories unless 'Purpose_of_Notification'	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		protection organisation?	<p>Trust or an equivalent organisation or standard.</p> <p>In such cases, suppliers should notify either 'Heat Trust' or 'HT Equivalent'.</p> <p>Registration with Heat Trust or an equivalent is not required when the DHC is a shared ground loop, with individual heat pumps in each property. In such cases suppliers should notify N/A.</p> <p>Where a Data Light Measure (DLM) is installed it must have consumer protection equivalent to TrustMark. 'TM Equivalent' should be entered.</p>				<p>cation' = 'New Exemption' or 'Edited Exemption' OR</p> <p>'Post_Main_Heating_Source_for_the_Property' = 'Shared Ground Loop GSHP'</p>	
M9	Insulation_Requirements_Met	If the measure is a heating measure, how did it meet the minimum insulation requirements?	<p>For a heating measure to be eligible it must meet certain minimum requirements for the insulation present in the property. The requirements may vary depending on the measure type and starting SAP band of the property. Suppliers should state here through which route the insulation requirements have been met.</p>	Alphabetic	All Present Pre-Project New Insulation Installed Due To Exemptions	Only entries corresponding to the list are valid.	Required when: 'Measure_Type' is a heating measure (boiler, DHC, ESH, solar PV and/or heating controls) unless 'Purpose_of_Notifi	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>Please see chapter 5 of the ECO4 Delivery Guidance for details of these minimum insulation requirements.</p> <p>'All Present Pre-Project' should be entered where every relevant insulation type was present in the property before the project started, so no insulation measure or exempt measure is required.</p> <p>'New Insulation Installed' should be entered where at least one ECO insulation measure has been installed in the same project and these measures result in the minimum requirements being met. These insulation measures should have DOCIs earlier than the heating measure they support.</p> <p>'Due To Exemptions' should be entered where one or more insulation types required to meet the requirements could not be installed due to attracting an exemption, and that if these measures had been installed the requirements would have been met before the project</p>		<p>New Insulation and Exemptions</p> <p>N/A</p>		<p>ation' = 'New Exemption'</p> <p>or 'Edited Exemption'</p>	

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>started. The exempt measures in question should be notified to Ofgem as part of the same project as the heating measure.</p> <p>'New Insulation and Exemptions' should be entered where a combination of both one or more exempt measures and one or more completed insulation measures has resulted in the insulation requirements being met. All exempt and insulation measures in question should be notified as part of the same project as the heating measure.</p> <p>N/A should be entered where the measure is not a measure type to which the minimum insulation requirements apply.</p>					
M10	Pre_Main_Heating_Source_for_the_Property	What was the fuel type of the main space heating system(s) for the premises before the measure was installed?	<p>For heating measures, this field indicates the heating source being replaced or repaired. For heating controls, the field indicates the heating source they will control.</p> <p>For Solar PV measures installed on or after 14 August 2023: if, prior to the</p>	Alphabetic	Valid entry taken from Table 21 or 22 of the ECO4 Delivery Guidance N/A	Only entries corresponding to the list are valid.	Required when: 'Measure_Type' is a heating measure (boiler, DHC, ESH and or heating controls and Solar_PV) unless 'Purpose_of_Notifi	Property / Person

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>installation of the measure, all or part of the property's heating is provided by a hydronic heat pump, ESH, or electric heating system with a responsiveness of at least 0.8, enter this as the pre-main heating source even if it is not the property's main heating system. Otherwise, enter the main heating system of the property.</p> <p>For Solar PV measures installed before 14 August 2023, 'N/A' should be entered.</p> <p>For measure types not mentioned above, 'N/A' should be entered.</p> <p>Table 21 in chapter 6 of the ECO4 delivery guidance includes the list of eligible pre-main heating sources. Also eligible in Table 22 are rare pre-main heat sources that are not listed in the scoring matrix. When one of these is notified it will be converted by the ECO4 Register to the associated proxy heating source listed in Table 22.</p>				<p>cation' = 'New Exemption' or 'Edited Exemption'</p> <p>Only required for Solar PV where DOCI is on or after 14/08/2023</p>	

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			For further guidance on determining the pre-main heating source, when it is required and how it impacts eligibility of measures please refer to chapters 5 and 6 of the ECO4 delivery guidance.					
M11	Post_Main_Heating_Source_for_the_Property	What is the fuel type of the main space heating system(s) for the premises after the measure was installed?	<p>For certain heating measures it is necessary to notify the heating source that has been installed at the property.</p> <p>The list of valid post-main heating sources can be found in Table 23 in chapter 6 of the ECO4 Delivery Guidance</p> <p>For measures where this is not relevant please enter N/A.</p> <p>For more information on the post-main heat source see chapters 5 and 6 of the ECO4 Delivery Guidance.</p>	Alphabetic	Valid entry taken from Table 23 of the ECO4 Delivery Guidance N/A	Only entries corresponding to the list are valid.	Required when: 'Measure_Type' is a boiler, DHC or ESH unless 'Purpose_of_Notification' = 'New Exemption' or 'Edited Exemption'	Property / Person
M12	SWMR_Conditions_Met	For solid wall measures, does the property meet the requirements	For premises to count as solid wall premises, and therefore be eligible to count towards the SWMR, at least 50% of the premises exterior wall area must be	Alphabetic	Yes N/A	Only entries corresponding	Optional	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		for the measures to be counted as a solid wall action?	<p>constructed of solid wall, and prior to the insulation measure at least 50% of the solid wall area must be uninsulated.</p> <p>Where the supplier is notifying an appropriate insulation measure type and the property meets these requirements, please enter 'Yes'.</p> <p>Where the property does not meet these requirements or they are irrelevant to the measure, please enter 'N/A'.</p>			ng to the list are valid.		
M13	Installer_Name	What is the name of the installer company responsible for installing the measure?	Provide the full name of the installer company that carried out the installation of the measure at the premises. This should not be the name of the managing agent unless they carried out the installation.	Alpha-numeric	Max character length of 150 characters N/A	Only entries in the accepted format are valid.	Required unless 'Purpose_of_Notification' = 'New Exemption' or 'Edited Exemption'	Measure
M14	Innovation_Measure_Number	If the measure is an innovation measure, what is the Innovation Measure Number?	Every approved innovation measure application is given an innovation measure number. These numbers can be found in the ECO4 Approved Innovation Measures document on the Ofgem website.	Alpha-numeric	NNN N/A	Only entries corresponding to the list are valid.	Optional	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			<p>The presence of a number in this field indicates the measure is an innovation measure. If the measure is not an innovation measure please enter 'N/A'.</p> <p>This number will be used to assign the correct innovation uplift to the measure/project.</p>					
M15	Trustmark_Business_Licence_Number	If the measure is registered with TrustMark, what is the TrustMark business licence number?	<p>All ECO measures that are captured in the scope of PAS2035 must be delivered by a TrustMark registered business and suppliers must notify the number on the ECO4 register.</p> <p>This field will be validated against TrustMark's Data Warehouse.</p>	Numeric	NNNNNNNNN NNN N/A	Only entries that match with TrustMark's Data warehouse are valid.	Required for all completed measures captured in PAS2035	Measure
M16	Trustmark_Unique_Measure_Reference	If the measure is registered with TrustMark, what is the TrustMark unique measure reference?	When a measure is lodged with TrustMark a unique TrustMark measure reference will be generated. A supplier must have this number before notifying the measure to Ofgem.	Alpha-numeric	Max 20 characters N/A	Only entries that match with TrustMark's Data warehouse are valid.	Required when: 'Trustmark_Business_Licence_Number' ≠ 'N/A'	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
			This should be the same as the TM project reference number plus an additional 4 characters to signify the unique measure.					
M17	Trustmark_Lodged_CertificateID	If the measure is registered with TrustMark, what is the TrustMark's lodged certificate ID?	<p>Provide a TrustMark lodged certificate ID which will be issued by TrustMark for the measure. The measure will not be approved as a qualifying action until the certificate ID has been notified.</p> <p>This field will be validated against TrustMark's Data Warehouse.</p> <p>This should be the same as the TM project reference number plus a hyphen and a number to signify the lodgement ID.</p>	Alpha-numeric	ANNNN-N ANNNNN-N ANNNNNN-N ANNNNNNN-N N/A	Only entries that match with TrustMark's Data warehouse are valid	Required when: 'Trustmark_Business_Licence_Number' ≠ 'N/A'	Measure
M18	Other_Certification	If the measure is a DHC or DLM installation, what certification does the installer hold to demonstrate appropriate skills and experience?	<p>Please state the full name of the qualification or certification that is relevant to the measure.</p> <p>DHC measures under ECO involve the installation, or connection of a central heating system to a District Heating System. For this we would consider a Level 2 or 3 NVQ in gas, plumbing and/or mechanical engineering, appropriate skill</p>	Alpha-numeric	Max character length of 150 characters N/A	Only entries in the accepted format are valid.	Required when: 'Measure type' belongs to the DHC or DLM measure categories unless 'Purpose_of_Notification' = 'New Exemption' or	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		If the measure has been certified through any other alternative mechanism, provide the details here.	<p>and experience to install or connect a central heating system. Appropriate skill and experience can also be evidenced through certification schemes which require the above qualification, such as Gas Safe.</p> <p>Other certification is not required when the DHC is a shared ground loop, with individual heat pumps in each property. In such cases suppliers should notify N/A.</p> <p>For further information on this requirement please refer to the ECO4 Delivery Guidance.</p> <p>For a Data Light Measure (DLM) the appropriate qualification or certification should be arranged with Ofgem as part of the data light application.</p> <p>For all other measures please enter N/A.</p>				'Edited Exemption' OR 'Post_Main_Heating_Source_for_the_Property' = 'Shared Ground Loop GSHP'	
M19	Exemption_Category	If the notification is for an exempt measure, please	For the purposes of ECO4 rules, measures may only be exempt where they meet one of a set list of exemption categories.	Alphabetic	Listed building	Only entries correspondi	Required when: 'Purpose_of_Notification' = 'New	Measure

No.	Data	Question	Information	Data Field Type	Accepted Format	Validations	Mandatory	Review Tab
		provide the reason for the exemption.	Provide the reason here. Where the project is lodged with TrustMark, the exemptions will be validated against TrustMark data. For non-TrustMark projects, suppliers must be able to provide the relevant evidence for the exemption. The required evidence for each exemption category is listed in the ECO4 Delivery Guidance.		Conservation area Protected species Unlawful Environmental conditions Property suitability/access issues N/A	ing to the list are valid	Exemption' or 'Edited Exemption'
