

Making a positive difference
for energy consumers

Richard Welsby
Associate Director
Last Mile Gas

Email: gas.systems@ofgem.gov.uk

Date: 30 March 2026

Dear Richard,

Proposed Modifications to Last Mile Gas Connection Charging Methodology

You submitted a revised copy of your Connection Charging Methodology ("the CCM") and a Modification Report ("the report") to us¹ on 02 March 2026. In your report, you propose the following modifications to the CCM:

- (a) the removal of the Domestic Load Connection Allowance (DLCA); and
- (b) several administrative and housekeeping changes.

Standard Condition ("SC") 4B of your Gas Transporter Licence states that we can give a direction in respect of any proposed connection charging methodology modification, that the modification shall not be made. Having regard to the modifications proposed, we have decided not to veto the modification. Our decision, including our reasons are detailed below.

Background

SC 4B of the Gas Transporter Licence sets out the obligations for you to put in place and maintain a connection charging methodology. In particular, condition 4B(4) states that you must review the connection charging methodology at least once in every year and make modifications for the purpose of better achieving the relevant objectives.²

¹Ofgem is the Office of the Gas and Electricity Markets Authority. The terms 'Ofgem', 'the Authority', 'we', 'our' and 'us' are used interchangeably in this document.

² SC 4B, paragraph 4 [Gas Transporter Standard Licence Conditions](#)

It also states that any modifications must be submitted to us alongside a report which sets them out, explains why they will better facilitate the relevant objectives³, and includes a timetable for implementing the changes. We have a 28-day period starting from the date this information is submitted to issue a direction to the licensee that the modifications shall not be made.⁴ The modifications you propose are described in more detail below.

Modifications to the CCM

Modification (a): Removal of the Domestic Load Connection Allowance (DLCA)

You propose to amend Sections 2.1, 2.4, 5.9 from the CCM, removing all references to the DLCA throughout the CCM, including definitions, cross references, figures and examples, to ensure internal consistency across the document.

You suggest that this modification would better achieve relevant objective (a).

Modification (b): Administrative and housekeeping changes.

You propose several administrative changes, including updates to section numbering, formatting, references, document name, contact information and definitions. These changes improve clarity within the CCM and ensures the CCM remains accurate following the removal of DLCA.

You have proposed that all changes take effect from 01 April 2026

Our comments

Modification (a): Removal of the Domestic Load Connection Allowance (DLCA)

We do not object to this modification. We agree that removing sections and references pertaining to the DLCA is appropriate and reflects the policy positions of Ofgem as set out in our Specific Methodology Decision⁵ (SSMD) and Final Determinations for RIIO-3⁶ to withdraw the allowances from the RIIO framework and remove any associated licence conditions from 1 April 2026.

You suggest that this modification would better achieve relevant objective (a). We agree.

³ The relevant objectives are set out in SC 4B, paragraph 5.

⁴ SC 4B, paragraph 6 [Gas Transporter Standard Licence Conditions](#)

⁵ [RIIO-3 SSMD GD Annex.pdf](#) [RIIO-3 SSMD GD Annex.pdf](#)

⁶ [RIIO-3-Final-Determinations-overview.pdf](#)

This modification will align your CCM with the RIIO-3 GD FD, as well as any resulting amendments to your Transporter Licence; it will therefore facilitate the discharge by you of the obligations imposed on you under the Act and by your Licence.

However, we consider the proposed modification to also better facilitate objectives (c) and (d). This modification ensures connection charges levied on consumers by you, reflect the removal of the DLCA; it therefore results in charges which, as far as reasonably practicable, reflect the costs incurred by you in running your transportation business (objective (c)).

Modification (b): Administrative and housekeeping changes

We do not object to this modification. The proposed administrative changes to the CCM improve its overall structure and readability and provide greater clarity throughout the document. The proposed changes support alignment with CCMs adopted by other Independent Gas Transporters (IGTs).

Ofgem's Principal Objective and Statutory Duties

Ofgem's principal objective is to protect the interests of existing and future consumers in relation to gas conveyed through pipes. We consider that the modifications proposed this year are consistent with this objective, by facilitating your compliance with the Act and terms of your Licence, ensuring cost-reflective charging, and aligning your CCM with business developments resulting from the RIIO-3 FD.

Decision Notice

In accordance with paragraph 6 of Standard Condition 4B of the Gas Transporter Licence, the Authority has decided not to issue a direction to prevent any of the proposed modifications set out in the Last Mile Gas report and CCM. All proposed modifications may proceed as submitted.

Please note that this decision pertains only to those matters we are required to consider when deciding whether to approve proposed modifications to a connection charging methodology in accordance with SC 4B. For the avoidance of any doubt, nothing in this letter fetters our discretion to make any other decisions and take any other actions.

In the interests of transparency, we will publish this letter on our website.

Yours sincerely,

William Duff

Head of Gas & Hydrogen Systems Management and Operation
