

## Annex 5 – Mapping our BPI Early Proposals to Ofgem’s Archetypes

As detailed in our cover letter, we submitted a BPI Early Proposal to Ofgem setting out our proposal for an Enhanced Facilitator role for DNOs in the rollout of LCTs, with associated RIIO-ED2 pilots. Whilst we badged our proposal as ‘Enhanced Facilitator’, our proposal goes well beyond the model for Enhanced Coordination as set out in Ofgem’s consultation, extending to elements of both the Laying the Groundwork and Widening Participation archetypes under Expanded Delivery. For clarity, Table 1 below sets out the elements of each of the archetypes that our BPI Early Proposal and associated pilots will test. We are keen to engage further with Ofgem on this.

Table 1: Mapping SSEN-D Early Proposal to Ofgem's archetypes

Model	Area-based upgrade scheme	Local enabling works	Provide direct household advice	Identify suitable properties	Bulk procure LCTs on behalf of installers	Coordinate network upgrades with area-based retrofit programmes	DNO responsible for installation	DNOs fund the installation	DNO owns and operates LCT
Laying the groundwork	✓	✓	✓		✓				
Widening Participation	✓	✓				✓	✓	Part	
Focused Intervention				✓			✓	✓	✓
SSEN Early Proposal + pilots	✓	✓		✓		✓	Testing commercial arrangements with installers and partners	Testing alternative funding routes inc GBE / DESNZ
