Distribution Flexibility Procurement Statement 2026

1. Introduction

Vital Energi Power Networks (VEPN) is an Independent Distribution Network Operator (IDNO). We operate across Great Britain and operate networks in all Distribution Network Operators' Service Areas. This statement supports VEPN's Electricity Distribution Standard Licence Condition 31E: Procurement and use of Distribution Flexibility Services and is in a form approved by Ofgem.

2. Flexibility Services Requirements

We have not identified any short- or medium-term requirements to introduce flexibility on our networks and as a result, currently have no plans to procure flexibility services.

3. Tendering Process

With no foreseen requirement for flexibility in the short- or medium-term, we have no requirement for a tendering process currently. Should this change in the future, robust processes will be developed accordingly.

4. Stakeholder engagement

With no foreseen requirement for flexibility in the short- or medium-term, we have no requirement for stakeholder engagement currently.

5. Detailed quantitative assessment

With no foreseen requirement for flexibility in the short- or medium-term, we have no requirement for detailed quantitative assessment currently.

Yours sincerely,

Mike Cooke
Managing Director
