Standard Condition A3: Payment of the Licence Fee**Introduction**

The purpose of this condition is to set out the Licensee's obligation to pay the Licence Fee and set out how the Licence Fee is calculated.

Structure of this condition

3.1 This condition is structured as follows:

(a) Part A sets out how the Licence Fee is calculated; and

3.2 (b) Part B sets out when the Licensee is required to pay the Licence Fee.

Part A: Calculation of the Licence Fee

3.3 For each Charging Year, the Regulator shall estimate the costs (the "**Regulator Costs**") which are likely to be or which have been the costs of the Regulator in performing its functions under the Act as the economic regulator for carbon dioxide transport and storage networks (and excluding any costs of the Regulator associated with the performance by the Regulator of any of its other functions).

3.4 In estimating the costs referred to in Standard Condition A3.3, the Regulator shall have regard to principles determined by the Regulator for the purpose of this condition (after consulting the Licensee and others likely to be affected by the application of such principles) and notified to the Licensee in advance.

3.5 To calculate the Licence Fee and give notice of it to the Licensee, the Regulator shall:

(a) determine the proportion (as a percentage figure) of the Regulator Costs attributable to the Licensee (the "**Appropriate Proportion**") in accordance with the principles determined by the Regulator for the purposes of this condition (after consulting the Licensee and others likely to be affected by the application of such principles);

(b) calculate the amount (the "**Licence Fee**") which is equal to the Appropriate Proportion of the Regulator Costs; and

3.6 (c) notify the Licensee of the Appropriate Proportion, the Regulator Costs and the Licence Fee.

Part B: Payment of Licence Fee

In respect of each Charging Year at the beginning of which the Licensee holds this licence, the Licensee must pay to the Regulator the Licence Fee, in respect of the Regulator Costs for that Charging Year, in accordance with Standard Condition A3.5.

Appendix 2 - Updated Licence (Annex A to Section A)

The Licence Fee calculated in accordance with Standard Condition A3.5 must be paid by the Licensee to the Regulator in two instalments:

- 3.7
- (a) the first of which must be paid by 31 July in each year, if the Regulator gives the Licensee notice of the amount of that instalment by 30 June in the year; and
 - (b) the second of which must be paid by 31 January in each year, if the Regulator gives the Licensee notice of the amount of that instalment by 1 January in the year.

3.8

If the Regulator does not give the Licensee notice of the amount of the instalment by 30 June or (as the case may be) 1 January in the year, the Licensee must pay the amount in question within 30 days after the date on which the Regulator does give such notice to the Licensee.

3.9

If the Licensee does not pay the amount determined in accordance with Standard Condition A3.5 within 30 days after the relevant payment date referred to in Standard Condition A3.7(a) or A3.7(b), it must with effect from that date pay simple interest on the amount:

- (a) at the rate which is from time to time equivalent to the base rate of NatWest Bank plc; or
- (b) if there is no rate equivalent to the base rate of NatWest Bank plc, the base rate of an equivalent institution designated by the Regulator for this purpose.

Standard Condition A4: Housekeeping Modifications**Introduction**

The purpose of this condition is to provide a process for making Housekeeping Modifications to the licence and any Project-Specific Document.

Structure of this condition

4.1 This condition is structured as follows:

(a) Part A sets out the process for determining whether a modification constitutes a Housekeeping Modification; and

4.2 (b) Part B sets out the process for making Housekeeping Modifications.

Part A: Assessment of proposed modification

4.3 Notwithstanding any other provision of this licence, the Regulator may make Housekeeping Modifications to this licence or any Project-Specific Document in accordance with this condition.

4.4 Before initiating any modification under this condition, the Regulator will assess whether that modification is a Housekeeping Modification.

4.5 In making the assessment required by Standard Condition A4.4, the Regulator will have regard to all relevant factors, including the views of the Housekeeping Modification Working Group.

4.6 Part B: Process for implementing Housekeeping Modifications

4.7 If, having carried out the assessment required under Part A, the Regulator considers that the intended modification is a Housekeeping Modification, it may modify the licence or a Project-Specific Document (as relevant) by direction to implement the intended modification.

Subject to Standard Condition A4.8, before making a direction under Standard Condition A4.6, the Regulator will publish on the Regulator's Website:

- 4.8
- (a) the text of the proposed direction;
 - (b) the reasons for the proposed direction, including why the Regulator considers that it is a Housekeeping Modification; and
 - (c) a period during which representations may be made on the proposed direction, which will not be less than 28 days.

Where a Housekeeping Modification relates to a Project-Specific Document, then instead of publishing the information referred to in Standard Condition A4.7, the Regulator will:

Appendix 2 - Updated Licence (Annex A to Section A)

- (a) send that information to the Licensee;
- (b) provide the reasons for the proposed direction, including why the Regulator considers that it is a Housekeeping Modification; and
- (c) state a period during which representations may be made on the proposed direction, which will not be less than 28 days.

A direction under Standard Condition A4.6 will set out:

- (a) the modification to the conditions of this licence or a Project-Specific Document (as relevant); and
- (b) the date on which it is to have effect or the mechanism by which that date is to be determined.

Part A: Specified Area

This licence is granted for the "NEP CO2 Network" within the Specified Area and more particularly defined in Standard Condition A5.4.

5.3

Part B: T&S Network

In this condition, "NEP CO2 Network" means the T&S Network to be built, operated and maintained by the Licensee of which:

5.4

- (a) the geographical location of the Onshore Transportation System is identified in Annex A to section A, as expanded or varied in accordance with this licence; and
