Energy Act 2023
Section 13(2)
Decision to approve the Change in Scope, under limb (c) of the Licence Change in Scope definition in Special Condition E1, to cancel the BOC & H2T Spurline projects, amend the Approved Project Development Plan, Technical Details Document, Financial Settlement Document and update Section A of the carbon dioxide transport and storage licence held by Net Zero North Sea Storage Limited.

1. Under section 13(2) of the Energy Act 2023 ('**the Act**') the Gas and Electricity Markets Authority (the '**Authority**')[1] gave notice on 31 August 2026 ('**the Notice**') that we proposed to modify the carbon dioxide transport and storage licence and its project specific associated documents granted under section 7(1) (as modified by section 16 and Schedule 1) of the Energy Act 2023 (the '**Licence**') held by Net Zero North Sea Storage Ltd (herein referred to as the '**Licensee**') by:
    - amending the Approved Project Development Plan (the 'APDP'), Technical Details Document (the 'TDD') and Financial Settlement Document (the 'FSD') to reflect the cancellation of the BOC & H2T carbon capture & storage, and thus removal of these projects as users of the network; and
    - updating Annex A of Section A of the Licence accordingly.
2. We received three responses to the Notice, from industry stakeholders and members of the public which we have carefully considered. We have published all responses on our website.
3. The Authority has decided to proceed with its decision to modify the Licence, with some variations from the proposed position in the Notice, following review of the responses. Full details of the reason for any differences between the final modifications and those set proposed in the Notice are outlined in the full text of the determination, published alongside this notice on Ofgem's website.
4. The modifications to the Licence will take effect on 1st January 2027.
