Colin Green |
| 15.10 - 16.20 | Discussion |
| 16.20 - 16.30 | Closing remarks |

Format and objectives

The main purpose of the seminar is to facilitate open and frank debate about the structure of electricity distribution charges. We are keen for attendees to participate in the debate.

We see the event as an opportunity for a wide audience to influence the debate on the structure of charges rather. We would like to emphasise that this is an opportunity to get involved.

The workshop will inform the March 2003 structure of charges consultation.

Format and objectives - continued

The programme of speakers has been set up to facilitate discussion and covers the many of the key themes. Each presentation will be approximately 20 mins with 15-20 minutes for discussion.

The general discussion will provide an opportunity to raise other issues for debate and discussion.

A large version of the ofgem logo, with the word "ofgem" in white lowercase letters inside a rounded orange rectangle. The background of the slide features a blue-tinted image of electrical components, including a three-pin plug and a circuit board, with the word "hydro" faintly visible in the background.
