**Subject:** Ofgem Electricity Act Schedule 9 Consultation

Dear Alex,

Thank you for inviting BWEA to respond to the above consultation. At this stage our comments are as follows:

The wind industry is in a state of rapid change and evolution. As the introduction of more wind farm proposals increases, we are likely to gain more operational experience which will lead to a view being formulated on issues such as Schedule 9. We therefore need to be informed of any further policy changes in this area and we will want to feed in to the process in due course.

I look forward to hearing from you in the future.

Kind regards,

Chris Tomlinson

Head of Planning
