Dear David

Smaller Generator Issues Under BETTA

I am writing in response to the above consultation.

I would like you to note that we endorse the consultation response submitted by Scottish Renewables Forum. As a member of this body, we share their concern that the proposals outlined in the consultation will lead to discrimination against generators in Scotland.

In particular we are concerned that:

- a. Scottish generators do not face more onerous conditions in connecting to the Scottish grid, due to differential pricing and code obligations, than are faced by competitors operating in England and Wales;
- b. Independent companies like ourselves do not face the increased regulatory risk and financial uncertainty that would result from the proposed rebates and transmission charging figures now being considered.

Yours sincerely

Rob Forrest
