Dear Mr Haldearn,

**Response to Ofgem's Smaller Generator Consultation**

In principal as a company we are supporters of the BETTA project. However, Wind Prospect would like to bring to your attention their concern that the smaller generation consultation contains proposals that will prevent the achievement of objectives set out by BETTA.

We would also like you to note that as our representatives in the renewable energy sector in Scotland, rather than submit our own detailed response, we support the view of the Scottish Renewables Forum whole-heartedly on this issue and would refer you to the response which you will be receiving directly from SRF.

Yours sincerely,

Sarah Dooley  
Development Officer
