Subject: P161 GB Consultation

> GB consultation on P161 Enhancement of BSCCo Board Structure  
>  
British Energy does not support this modification. We believe that this modification will lead to a "conflict of role" for executive directors who are charged with both presenting the case for policy and plan and challenging and scrutinising it.

Adding additional Elexon Staff to the board will lead to unnecessary change and will not bring about any additional benefits to justify the changes.
