Dear Bridget,

Response to GB Consultation for NGC's Grid Code change proposal G/04 version 1.1 (Proposed changes to Operating Codes OC1 and OC2)

Thank you for the opportunity to respond to the GB Consultation for NGC's Grid Code change proposal G/04 version 1.1.

NGC has already provided its response (dated 23 June 2004) to Ofgem's GB Consultation on version 1.0 of G/04 (dated 15 June 2004). In that response, NGC stated that it supported implementation of G/04 at the earliest opportunity.

Version 1.1 of G/04 takes into account industry responses to version 1.0 of G/04 and proposes some amendments to the Grid Code text outlined in version 1.0. These amendments are mainly concerned with a revised definition of Output Usable and a clarification of the term 'Station demand'.

NGC believes that the changes proposed in G/04 version 1.1 would improve the operation of the BETTA Market and hence fully supports implementation of these changes on a GB wide basis.

Yours sincerely,

Shafqat Ali
