

ERRATUM TO FINAL IMPACT ASSESSMENT

Ofgem notes that there is an error in Figure 9.1: Shipper cost estimates of DN sales of the Final Impact Assessment. This is on page 139 of the document. The error relates to the labelling of the axes on the charts presented in that figure. The axis should have been labelled as thousands of pounds, rather than only pounds.

Ofgem has reproduced Figure 9.1 in the diagram below with the correctly labelled axis. All of the other cost estimates set out in the document are unaffected by this error.

Ofgem would like to thank the shipper for identifying this error and apologies for any inconvenience caused.

The original figure presented in the document has been updated accordingly.

Revised Figure 9.1: Shipper cost estimates of DN Sales
