June 2005

Dear Sonia Brown,

**Re: Third Party Proposal: Publication of Near Real Time Data at UK Sub  
Terminals Modification Reference Number UNC 006 (727) Impact  
Assessment Document**

We read with interest your impact assessment on the proposed modification to the Universal Network Code. The publication of the impact assessment document we believe provides enough evidence to successfully clear the modification.

As a company we believe in open and competitive markets. Rational gas purchasing decisions crucially depend on equal and open access to information concerning offshore activities and see no good reason why near real time terminal flow data should not be made available. This information is in any event known to other gas producers before the rest of the market.

Yours Sincerely

*Philipp Monanni* - OPERATIONS MANAGER
