

EA Permit Details

Customers will need to check emission permit details

In a difficult winter scenario:

- Would an amendment be required?
- Which emissions would this amendment relate to?
- Does the customer have the capability to switch to an alternate fuel?
- Is this capability detailed on the permit?
- Does the permit only allow for interruption by Transco?
 - this may need to be amended following UNC 740a

Rob Rustage, Fuel Switching Coordinator, **Environmental Agency**
